

### Scary Marvel villains

This is a list of Marvel villains who are scarier than Thanos.

<https://digit.in/may19-89>

### Amazon music service?

Amazon is preparing to launch a high fidelity music streaming service.

<https://digit.in/may19-90>

package takes an average 15 days to reach my home. I got my march issue in April. And that was after I requested you to send it again. I hope that you will fix this issue soon.

2. I don't know whether you guys already have it or not but I felt that it would be a great idea to make a discord server. I think it would be fun to talk with people who have similar hobbies and likings like you. And who knows that

Agent001 might overcome his introverted side. You guys host an event ask ideas for articles and even conduct contests like article writing or art contests or some indie game dev contests. I think it would be a lot fun.

That's it for this letter. I had some more other suggestion but I think this should be enough for now and please make sure to create the discord channel ASAP. It's really easy

and takes less than 10 mins to setup the whole thing and I think it's a lot more convenient than making a whatsapp group.

PS:- make sure to invite me first my discord id is \*\*\*\*\* (censored)

–Milan Muhammed

**d** I will have someone look into fixing your mailing issue asap. And yes, we will look into making a Discord server.

–Robert

## Letter of the Month

Hi guys and love from Panchkula. Keep up the good work! I have been reading Digit for the past 2-3 years now – first at the school library and now with subscription. Needless to say, I have seen many changes over the years. Most good and some bad.

SKOAR! has been my favorite part of the mag since I first picked it up. However now its content has been reduced from 2 reviews 1 story and 1 franchise to 3-4 reviews 1 cover story and 1 bonus story (The PUBG article in the April edition). Although it may seem like there is more on paper, but reviews while entertaining are not really what I am looking for. I would really prefer to read something that would be informative. Reviews of the latest games that I can't play? No thank you.

I know you guys do a lot of work and would be loathe to do even more since you have AC and rat problems, but I am mean that way :-P

### I have some suggestions for SKOAR!:

1. Add a "Genor" (genre) article: This article could be about a genre of games or sub-genre and what games are the best in this category (JRPGS, RTS, MOBA etc.)
2. Add a 'KARACTAR' (character): This article could be about the game characters that have left a massive cultural footprint (Ezio Auditore from AC, Soap and Capt. Price from CoD, etc)
3. Add a 'PHLASHBAK' (flashback) article: This article could be about old games that can run on basic to entry level computers. Sort of like a review ('Yeah I am a hypocrite'). This would allow people to buy these games when their cost drops steeply.

### And now a few for the mag:

1. Many a times you say some jargon and print sentences like 'Being a digit reader...' or 'Since we already have talked about this...' assuming that all people would be knowing what you are saying but the fact is that they

don't since no one can read all your mags and remember it all so can you please just leave links in the bottom for the articles where you have already explained these things?.

2. Similar to the last a lot of time during reviews or articles you talk about the CPU or GPU technical parameters. Can you create a link so that we can read up about what these parameters mean?
3. Add a anime section to cult. PLEASE. You could just give reviews on new animes (Many airing these season) and create a list of must watch anime of certain genre or type ?

Thanks for reading my letter. Its a bit too long so here's a potato\* for all of you at Digit.

(\*Anyone understood that reference?)

–Amogh Walia

Hey Amogh, We're glad that you like SKOAR! It's something most of the writers at Digit are quite passionate about and don't mind doing for free. The thing about SKOAR! is that not every month has a good set of video games coming out, so the structure remains quite dynamic. When there are more games, you'll see more reviews but even we prefer to have PHEACHUR articles. Everyone can write a review, PHEACHURS require a lot more EFFURT. The new article suggestions you've mentioned are actually stuff we've done in the past. In fact, the reason why you don't see them as much is because we've run out and are looking to find better things to write about. You'll see a lot more PHEACHURS such as the GENOR, KARACTAR and PHILASHBAK in the coming months now that we have Manish, the main SKOAR! guy, back on the team. As for the anime content, check out Geek.digit.in, we tend to cover anime over there but we hear you. You'll see more of anime in the mag as well.

Lastly, our cover story this month should put you in the league of Digit Readers who understand all the complex CPU/GPU jargon. :)

PS: Your letter was long, we used a banana for scale.

–Mithun
