

GEEK CULTURE IS OUR WAY OF LIFE, AND ENCOMPASSES MOVIES, GAMES, COMICS, AND TRENDS FROM ACROSS THE GLOBE

INSIDE

THIS MONTH IN CULT:

This May, you'll be out of Game of Thrones and recovering from the End-game, so we brought you a list of awesome but underrated sci-fi shows to watch on Netflix. Booman, however, has managed to complain about the entire month of April.

Halo TV series casts Master Chief

The highly-anticipated and years-in-the-making TV adaptation of Halo has cast Pablo Schreiber in the role of Master Chief. The production is officially slated to start this fall, and we could be looking at a release that ties in with the launch of Halo Infinite. <https://dgit.in/HaloMC>

WHAT'S NEW

Game of Thrones Season Eight premiere breaks records

The highly anticipated eighth and final season of HBO's Game of Thrones kicked off on April 14th and almost immediately smashed some records. A series record of 17.4 million people watched the season premiere. This includes 11.8 million television viewers, combined with those who streamed the show with the HBO Go or HBO Now apps as well as a couple of encore presentations. Whether this takes into account the viewership on international platforms like Hotstar is not entirely clear. Episodes for the eighth season stream simulta-

neously as their US counterparts on Hotstar in India. The previous record for the show was the season seven finale that had 16.9 million viewers back in August 2017. At the time of writing, two episodes are already out and have seen largely positive reviews

from fans. The season finale for season eight might smash all previous records for the show.

Star Wars: The Rise of Skywalker trailer teases old baddie

Earlier in April, Lucasfilm released the first trailer for Star Wars Episode IX, now officially titled 'The Rise of Skywalker'. If the title wasn't enough to generate a deluge of fan theories, the two-minute-long teaser-trailer gave eager fans a lot to process as well. There's also a lot of additional information. For instance, this movie is the end of the 'saga' that comprises of the original, prequel and currently ongoing

sequel trilogy. The trailer kicks off with a sequence on a desert planet where Rey dodges a

TIE-fighter-esque ship. Kylo Ren is also shown embracing his identity as the new Supreme Leader of the First Order, repairing his broken mask and

engaging in fights. There's also Billy Dee Williams reprising his role as Lando, at the helm of

the Millennium Falcon. It also looks like the story might be revisiting the origin of the story at Tatooine. After a "No one's ever really gone,"

voiceover from Luke, there's the most discussed reveal of them all - the unmistakable cackle of Emperor Palpatine.

Detective Pikachu new trailer

The latest trailer for the upcoming Detective Pikachu movie doesn't hold back on the cute quotient and showcases the emotional journey that the characters and the Pokémon will go through. We are looking forward to this one! <https://dgit.in/PikaPika>

Disney+ content on Hotstar

As a part of Disney acquiring Fox, Disney+ content will be streamed in India on Hotstar at no additional cost. The streaming platform will even localise content by dubbing or adding subtitles in local Indian languages for the country. <https://dgit.in/DPlusHS>

Toho expands in the west

Toho, the veteran Japanese studio behind the creation and ownership of Godzilla, is expanding in the United States with the goal of working more closely with Hollywood. It wants to enhance business around major characters. <https://dgit.in/TohoWest>
