

Wedding photos without Glam

Pon Prabhakaran, a wedding photographer from TN, has won acclaim for shooting wedding photos without glitz <https://digit.in/may19-57>

Improve your landscape shots

Photographer Gary Gough gives ten practical tips to drastically improve your landscape photography. <https://digit.in/may19-58>

One of the factors that make an image go viral is its improbably perfect timing, and some photographers have even undertaken projects dedicated to capturing such pictures

This image captured by Bruno Gerber, a Swiss Lawyer after he spotted the opportunity during a birthday party on his friend's rooftop.

This image was published by The Telegraph as part of their "Picture of the Day" series. The photographer, Pam Mullins, wasn't trying for this and thought that the contrails had actually ruined the picture!

The image is titled "Congruence" and was captured by Bernd Nowack, and took over a month of planning to get to the right vantage point for the tree and setting moon to align.

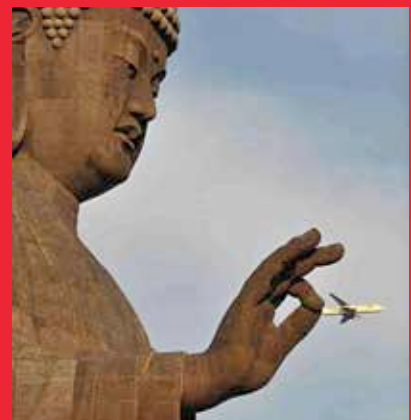

This image is all about perspective, and serendipitously coming across alignments. There is a full Instagram account of photos from The Coincidence Project @denischerim.

This is the rays of the setting sun caught in the ice. Nature photographer Sarah Bethea captured the image inside the Treasure Island Caves in Iceland.

This image of sun rays falling on the Edward Hopper painting, Nighthawks. Posted on r/oddlysatisfying by u/NightmareAkin.

This is an image by u/Former_Manc of a plane flying past the Ushiku Daibutsu statue in Japan (aka the Ibaraki Buddha). This click is a staple in optical illusion lists.
