Crosley RSD3 Mini Turntable

Vinyl has always resided in the hall of elite audiophilia. There are always a couple of formats within vinyl that differ in dimensions and are preferred differently by people. However, a relatively newer format, something more of a novelty, gained popularity back in its time. The three-inch record is starting to pick up the pace again and the Crosley RSD3 mini turntable could be a great option for playback. The turntable is a measly 6.1 x 2.8 x 4.7 inches in

terms of dimensions and weighs approximately half a kilogram. An AT-3600 Moving Magnet cartridge, pitch control and a fully-supported platter are part of the package too. You can use four AA batteries, or even a USB-power source to give the RS3 the juice it needs. There's an included aux-to-RCA cable as well for those who want to use their speakers and hi-fi systems with the RSD3. According to Crosley, the RSD3 will come with a 3-inch record of *Big Me* by the Foo Fighters to get folks started on their micro-vinyl journey. What are you waiting for, it's time to go vinyl again!

Price: \$69.95

Tackobox Smart Connect Fishing Reel

Wherever you look, all manners of things are adding the smarts. So much so that your idyllic, relaxing fishing trips are now all set to join the bandwagon as well. The new Smart Connect reel from Tackobox works with any rod and serves an essential purpose – to alert the user of a potential catch directly on their phone. There's an aluminium spool on the reel, housed inside a lightweight composite body, as well as a five-bearing anti-reverse mechanism, and a 4.7:1 gear ratio. A detachable rear-module houses the sensor that is capable of detecting fish bite vibrations on the rod. A Bluetooth unit and a rechargeable battery, capable of up to 40 hours of use, complete the module. The moment a fish strikes, the Smart Connect reel alerts the user via their choice of audio alarms, flashing display, or vibration. It can also track the GPS location of the catch and work with other Bluetooth-enabled camp equipment like lamps, to extend the effectiveness of the alert.

Price: \$119

Pininfarina Battista

An all-electric hypercar that hits 300kmph in 12 seconds (faster than an F-16 fighter jet) – that's the kind of power the Pininfarina Battista packs. With 1600 horsepower, a top speed of 350kmph and the ability to hit 100kmph in under 2 seconds, the Pininfarina Battista is arguably the fastest street-legal car ever built by an automotive manufacturer – even faster than a Formula

1 race car up to 100kmph. A 120kWh battery powers the motors that push the massive thrust that this beast is capable of, and is good for up to 450 kilometres worth of driving on a single charge. There are huge carbon-ceramic 6-piston brakes onboard that provide smooth deceleration and effective braking. The hypercar comes with a 2020 release date with about 150 units to be made. Interestingly, 2020 also happens to be the 90th anniversary of the legendary Pininfarina SpA design house.

Price: \$2.5 million
