

TV SHOW

Love, Death + Robots

Content Rating: 18+

★★★★☆ | Focussing on the increasingly shorter attention span combined with the habit of bingeing, Love, Death + Robots feels like a very smartly timed series from Netflix. The series of eighteen animated shorts explores a wide variety of genres ranging from science fiction to horror to comedy and fantasy. There is a lot of NSFW content in the show, so it is strictly for adults. Right from the first shot, Sonnie's Edge, we're introduced to intense gore, cursing and more. However, the true selling point of most of these shorts is the story they tell. In fact, some of the shorts with the most lifelike animation quality actually have some of the weakest storylines. On the other hand, outliers like Zima Blue, Three Robots, Fish Night steer into uncharted territory with their storytelling and remain memorable. In fact, the series breaks its own unspoken rule of animation-only content with Ice Age, having human actors as well. Helping Hand manages to compress the entirety of the excitement you felt during Gravity into its short run of ten minutes. If anything, the show is guilty of being too blatantly violent and mature at points where it wasn't necessary. Bingeing the series loses the impact of some of the individual shorts and is actually not advisable. As a whole, Love, Death + Robots is a must try. You will either love it or hate it.

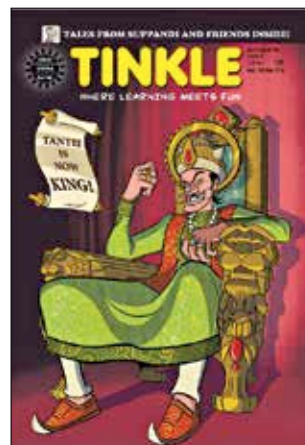

COMIC BOOK

Tinkle 2019, April 16, Issue 2 Vol. 39 No. 714

Content Rating: 0+

★★★★☆ This time Tinkle went ahead and did something that has never been done before, turning a long running and well loved series upside down. If you have not been up to date with what has been happening at Hujli since the '90s, then you will be glad to know that the kingdom has been keeping up with the times. All the conveniences of the modern era are available at Hujli, but still Tantri insists that Hooja use a palanquin to appease the "old school" crowd at the border region of Kaddur, which has seen some rebel activity. Along with a savvy assassin known as Deadhit, Tantri plots his regicide, only this time he is actually successful! No, this is not a dream sequence. Tantri the Mantri finally gets to sit on the throne of Hujli, and the population seems to take to the new King rather too readily. Some of the guards do get suspicious when Tantri exclaims how he "finally" is the king. The body of Raja Hooja is not found though, so we do not think it will be long before the status quo is restored, but we could be wrong. This is because there is a new, even more evil Mantri, and he is called Zantri. Zantri the Mantri now wants the throne, and soon Tantri could be given a taste of his own medicine.
