

Tattoos and privacy issues

Tattoo identification is becoming common with law agencies using it for profiling. <https://digit.in/june19-40>

Interesting tattoo facts

Here's a fun little read that lists 30 astonishing facts about tattoos and their history. <https://digit.in/june19-42>

There are few better ways to show your love for technology than getting inked, but now even the ink is getting high tech. We now have inks that change colour or monitor the health of the wearer.
