

# AN AIRCONDITIONER THAT THINKS LIKE YOU

## Livepure Smart Air Conditioners

**T**hese days when you hear the word "smart", it doesn't throw up images of appliances in one's mind. You might think of health trackers, speakers with built-in assistants and similar gizmos but not appliances. That is, until you check out the new Livepure Smart Air Conditioners. Think of the new Livepure air conditioners as an air conditioner clubbed with an air purifier, that's also enabled

Mode for comfort and Green Mode for energy efficiency.

Moreover, you can use voice commands via Amazon Alexa to interact with Livepure Smart Air Conditioners. Amazon's Alexa, is unique in the fact that it's not stuck to one ecosystem and is more open and welcoming which is why you have hundreds of thousands of devices compatible with Alexa. You can download the Alexa App on to your

switches the ACs on or off based on your phone's physical location. Simply set up the HEKA app and add devices and the corresponding address where the device i.e. the AC is installed. Then switch on the geofencing feature. Now your AC will start up right before you enter your home and it will have already cooled it to the right temperature.

Each Livepure AC comes with HEKA's i-Diagnosis feature which automatically monitors your air conditioner to figure out if it requires maintenance. The HEKA App constantly monitors

*Control all aspects from the comfort of an app*

*Get service call notifications automatically*

*Build custom profiles for each AC*

with AI (Artificial Intelligence) and ML (Machine Learning) features. Too good to be true? Well, truth is often stranger than fiction. Let's see how these air conditioners are smarter, cooler, and cleaner than the rest.

### SMARTER

The 'smartness' of the Livepure range of air conditioners can be attributed to the HEKA Technology that forms the underlying mechanic. These ACs can save up to 40% on energy bills because HEKA Technology continuously monitors room temperature and humidity among several other factors to optimise the room temperature. This is where the AI and ML features come into play. HEKA gives you three intelligent modes – Heka Mode for energy efficiency along with comfort, Magic

smartphone no matter which OS runs on your smartphone. So if you feel like reducing the cooling, simply call out to the AC and set the temperature to whatever makes you feel the most comfortable.

To give you even greater control over the air conditioner, you can use the HEKA app to utilise some powerful features such as Geofencing which

your AC and raises automatic alerts for the Service team so that they can alert you and set up a pre-emptive service check-up if there are any indications of faults. This way, you'll never experience any downtime.

Leveraging the different modes of the Livepure Smart air conditioner is how you can make the most of it. Take Night
