almost a decade now! We're definitely looking into A.I so look forward to more content surrounding that topic. Unfortunately, about the AR feature we had on SKOAR! We're assuming you mean Blippar, which we unfortunately had to discontinue because not too many people seemed to really be using the feature. We're sure if more people to write in to us about them, we may be able to do something about it.

–Manish

Hey Team Digit,

First of all your June edition of Digit was just mindblowing. My sister introduced this magazine to me and I have been reading this magazine since then (from July 2018). Your cover story 18 stories consisting 18 elements each was a fabulous idea. Your geek poster was fantastic.

During the summer vacation I was browsing the internet on articles about

Ethical Hacking and some common tools. But whatever I read I didn't understand it. Now when I ripped open the Digit package, I couldn't believe my eyes. It had a Fast Track entirely devoted to Ethical Hacking. And you guys explained it very well. The demystify on 18 wacky science experiments was extraordinary. The other Fast Track to 100 open source software was also very useful.

Well I have a doubt Team Digit. When I went to <https://geek.digit.in> and selected eDVD contents, it said that it was restricted to readers of digit only. And it said to head over to this link to redeem my unique code. When I clicked on this link, it went to the home page. Also I couldn't find my redeem code. Where can I find it? Please help me Team Digit.

You have reduced your spelling mistakes drastically, and added anime, thank you for those. Can you give

us the hacking tools that you named in Fast Track in the DVD? Can you increase the number game reviews each month. Also you are giving us the same set of essential tools each month.

P.S: The price tag is peanuts compared to the content that is inside the package.

–Shriram G

Thank you so much for your email Shriram. The eDVD will go live on 15th of June, and then every month on the 15th. You will not need a coupon code for the first edition as it will be priced at Rs 0. We are just testing the implementation and trying to see what it is we can actually do. Remember to send us feedback about how we can improve the eDVD. All of the hacking tools are included in the eDVD as well, yes. Keep writing to us, we love hearing from dedicated readers like you :-)

–Robert

Letter of the Month

Dear RSS,

At the outset let me wish you and Team Digit a very happy and memorable 18th Anniversary of Digit and wish you all a very successful and exciting experiences in the years to come which, a 72-year old enthusiast like me, among all your thousands of fans, looks forward every month for the "Blue Dart" guy come and give me my copy of that month. This is the most eagerly awaited packet for me every month.

Back in 1987 when I acquired my first PC - an Intel 80286 with a 20 MB hard drive and 1 MB RAM to start a Data Processing Center my guide was Electronics For You and The Chip through which I learnt my basics computing and data processing.

Like you, I too used to go to the newspaper stall every month end to look for my copy of Digit. This addiction started for me from the time when there was EFY - Electronics For You and THE CHIP, eighteen years ago CHIP became DIGIT but my craze for Chip/Digit has not subsided. Earlier I could go to the newspaper stalls in Mumbai then in Bengaluru and grab my copy of the Digit but, now my mobility is restricted due to age and health but Digit still comes to me through Blue Dart, and even a slight delay makes

me shoot mails all over the place for my digit.

For me too "DIGIT IS RAAABO'S DEBONAIR"!!

I am attaching a couple of pictures of myself with my collection of Digit along with Fast-Track, all the CDs and Digit Demystify. A picture they say is worth more than a million words and this picture I am sure tells a big story.

I wish you and team digit many many years of most illuminating, informative and successful magazine which will be a front runner in information technology.

Best wishes

–Dileep V Accanoor

Wow Sir,

Thank you for your email and for being such a loyal reader. You have brought tears to our eyes.

It is an honour to work at Digit, but it is letters like yours that make all the hard work the team puts in worth it in the end.

Once again, thank you sir for your email, you cannot fathom how happy you have made us all.

–Robert
