ONLY ABOUT 10.4 PER CENT ANDROID SMART-PHONES RUN ANDROID 9 PIE AS OF NOW, as per Google. Therefore, as time passes, eligible smartphones are continually getting the update to Pie. Additionally, Project Treble has ensured that several phones already have the beta versions of Android 9. Smartphones out there are vying for their own tasty slice of Pie. Android One phones, Samsung Galaxy J series, a number of LG

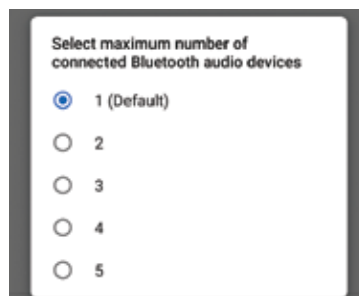

smartphones and many others will be getting the update somewhere around the last quarter of this year. Smartphone users who receive the Pie update can make the most out of their phone by using some of the nifty tips and tricks made possible by this update. Let's have a look at nine such tips and tricks smartphone users can utilise with Android 9 Pie.

REDUCE THE NUMBER OF BLUETOOTH DEVICES YOU CAN CONNECT TO

Previous versions of Android only allowed users to

connect to one Bluetooth audio device, however, with Android Pie that number has now been raised to five. In case you actually want to reduce the number of devices your smartphone can concurrently connect to, first enable Developer options by clicking on Build Number in the About Phone section in Settings continuously and then scroll down to Maxi-

You can connect to 5 Bluetooth devices with Android Pie, but you may not want to.

imum connected Bluetooth audio devices option and select a lower number.

MUTE ALL REPETITIVE NOTIFICATIONS

Android Pie can actually recognise when you have been constantly dismissing notifications from the same app and will ask you if you want to mute them or allow them to keep displaying. This is a nifty little feature since most of us don't want non-stop notifications from food ordering apps, travel apps and more. However, if you do want to bring back notifications from any app you have muted, you need to open Settings > App & notifications > Notifications. Here you can see how many alerts each app has sent and toggle the notifications on or off as you require.

RESET THE ADAPTATIVE BATTERY FEATURE

Android Pie uses machine learning for their Adaptive Battery feature which shuts down unused apps that are running in the background to preserve battery life. In case this feature picks up bad habits, you can
