seasons, 73 episodes, 70 hours, 4200 minutes, and so on... Game of Thrones has been an integral part

of a staggering 17.4 million viewers' lives since the year 2011. Readers of George R. R. Martin's books, which

inspired the series, have had GoT in their lives since 1996! The final episode of Game of Thrones aired on May 19 and the episode, rather a huge chunk of the last season, brought an onslaught of mixed emotional reviews. Some loved the treatment while some – more like a vast majority – vehemently revolted the ultimate season of the much-loved show. Regardless, a void has been created in our lives and

we, at Digit, attempt to fill this GoT-sized void with a comprehensive list of TV shows that could possibly prove as worthy alternatives for the massive TV phenomenon, GoT, that breathed its last this summer.

ROME

Rome is an underrated TV show that revolves around two Roman soldiers during Julius Caesar's time. Unfortunately, the historical drama was cancelled after a mere two seasons, since the production costs were ap-
pallingly high and it never really got the audience to support these costs. You can still watch the two seasons with 22 episodes and enjoy it thoroughly since it doesn't feel unfinished or lacking even though the series was cancelled. While Rome lacks nerve-racking fights like in GoT, it has a stellar storyline and a capable cast. Much like GoT itself, being the protagonist or even an influential character in the show still doesn't

guarantee survival and these characters can be cut from the show just as mercilessly as George R. R. Martin is known for doing.

BLACK SAILS

Black Sails features a lot of the elements that pulled in viewers for GoT in spades, along with an enthralling storyline as well. Black Sails follows the adventures of a feared pirate of the golden age. While the first season may seem to be a tad too flashy, the next two seasons rectify this and more. The characters and style of storytelling are quite unique as well. Basically, if you like action-packed TV series, you can't go wrong with Black Sails. While this show takes longer to hook viewers to it than the flashy season one of Game of Thrones
