

New Start menu reveal

Microsoft accidentally reveals redesigned Windows 10 Start menu and it looks pretty bland. <https://dgit.in/aug19-47>

FTC sues Cambridge Analytica

The FTC has taken legal action against Cambridge Analytica for deceptively harvesting information. <https://dgit.in/aug19-48>

Google
Pixel 3a

Fingerprint sensor

The fingerprint sensor of the Pixel 3a is a traditional one mounted on its rear. The fingerprint sensor has a unique shape owing to its wavy tail (flex cable). However, much like other parts in this device, it is easily removable.

Modular components

On the bottom edge of this smartphone, you can see a modular USB Type-C port which is a welcome change and something that is expected, especially since the device does not offer wireless charging. There's also a modular headphone jack.

Active Edge Sensors

The device also has two golden flex cables for the Active Edge sensors (which allow the squeeze for Google Assistant feature). In previous Pixel devices, these cables were tucked under the battery, however, now they are routed over the battery which makes it less likely to get destroyed due to obsessive prying around.
