

Hitchhiker's coming to Hulu

A Hitchhiker's Guide to the Galaxy series is heading to television; will stream on Hulu. <https://digit.in/aug19-55>

Tencent, Pkmm company team up

Chinese giant Tencent announced that it is working with The Pokémon Company to develop games. <https://digit.in/aug19-56>

Cold/Mess by Prateek Kuhaad

out Indian-origin Netflix and Amazon Prime shows that are nothing like the 'saas-bahu' sagas we are so used to witnessing on Indian TV channels. They talk about mature issues, have great storylines (for the most part) and free themselves from the shackles of censorship.

We recommend: *Leila* (2019), *Sacred Games*, *Breathe*, *Smoke*, *Ghoul*

ARTISTS AND BANDS

India is brimming with musical talent, be it YouTube cover artists, indie bands, solo artists or more. While artists like Nucleya have redefined the Indian club scene, with a fusion of Hindi lyrics and electronic beats, artists like Shirley Sethia have delighted millions of YouTube frequenters with their commendable vocals. India even has a singing show called *The Stage*, where artists only sing English songs. Anushqa (Anushka Shahaney), a product of this show, is quite talented and has an amazingly unique voice. Prateek Kuhad is a heartthrob in the country, with his song *Cold Mess* delivering stirring lyrics and *Tune Kaha* featuring a catchy tune. Vidya Vox is another talented YouTube cover artist who sings fusions of Bollywood and English songs.

We recommend: *Vidya Vox*, *Prateek Kuhad*, *Anushqa*, *Nucleya*, *Shirley Sethia*, *Chai Town* (acapella), *Coke Studio India*

BOOKS

India's literary history and tradition span over 3,000 years. While Indian English literature has a relatively shorter history in India, it is still rich with plenty of award-winning and critically acclaimed books that you should definitely read. Arvind Adiga's *White Tiger* is a masterpiece and its take on social class disparities in contemporary India is quite refreshing. *Palace of Illusions* by Chitra Banerjee Divakaruni retells Mahabharata from Draupadi's perspective and is quite an interesting read. If you're looking for a fun read, you should check out Tamil Pulp Fic-

tion, a book containing several pulp short stories which are brimming with action, cheesy lines, romance and drama. Last but definitely not the least, Arundhati Roy's *The God of Small Things* is a Booker-Prize-winning novel which discusses various issues such as the caste system, communism, and more.

We recommend: *The God of Little Things*, *White Tiger*, *Palace of Illusions*, *The Guide*, *In Custody*, *Tamil Pulp Fiction*

CONTENT CREATORS (YOUTUBE)

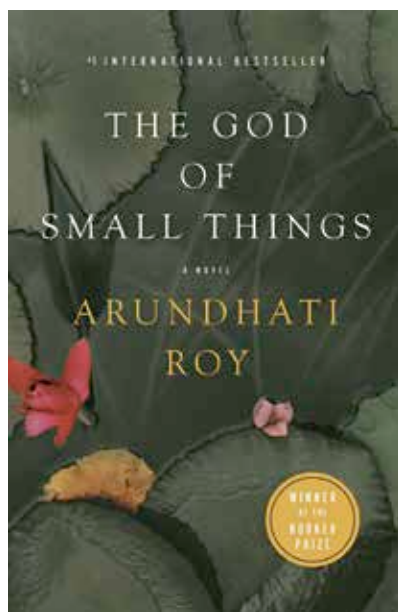

YouTube has allowed tons of individuals to gain access to a space where they can showcase their talent and earn a living by following through

BB Ki Vines has over 14 million subscribers

their passion. As content creators in India or of Indian-origin go, we see two types emerge – content creators who follow a tried-and-true format and apply the Indian context to appeal of the masses in the country, and content creators who create themes and skits by working with Indian culture and its nuances. BB Ki Vines has garnered massive popularity by performing comedy skits where he enunciates Indian culture and its nuances, similar to Lily Singh who, like BB Ki Vines, plays several characters in her videos to generate a comedic effect. YouTubers like Technical Guruji and Geeky Ranjit are also immensely popular for their technology reviews, unboxings and more.

We recommend: *BB Ki Vines*, *Superwoman*, *Technical Guruji*, *Geeky Ranjit*, *MostlySane*

The God of Little Things won the Booker Prize
