

digit diary

If you are ever curious about what the **Digit gang is up to**, this is the place to get all the inside info. From the **latest game we're obsessing about** to the newest intern we're driving up the wall – it's all here folks.

With practically no social lives, the folks from the team have been taking refuge in the world of video games often. If you've been reading the diary for the past few months, you'd have no doubt realised this. This time around everyone decided that they'd been gaming too much and it was high time they picked up another way to get their daily dose of endorphins. **So what did everyone do? Switched to other video games... *sigh* Manish started playing LoL TFT, a blatant rip-off of Dota Auto-chess. Mithun being the purist stayed away from TFT and dived into Dota Underlords, another equally blatant rip-off.** Dhriti decided not to join the two and instead started playing mobile games, except the ones she chose were so bad that all you'd hear from her were a string of complaints. Aditya, on the other hand, has remained steadfast with his commitment to Warframe and Borderlands 2. It's been nearly two

years since he's joined back and we're yet to ascertain when he'll get bored of those two games. Boss-man Raaabo is the only one to have experienced the outside world as his favourite football team ManU was touring the land down under, and he made the most of every opportunity to go see them live. Real-world experiences do certainly make for excellent memories but they also have a downside. You see, this was most fun Robert has had in a long time. So much that we can say his happiness peaked. And you know the only way one can go from there is... down. As of writing this, we can only surmise that he is battling a nasty bout of crippling depression.

And now, for a special bulletin on the Team's progress in Minecraft. Manish in his pursuit to lead a migration run from one biome to another,

felt it was prudent to break everyone's beds and take them with him to a far-away place. The only problem was that he died such a lousy death that there was no way to complete the migration everyone ended up spawning at the home base. Doesn't sound bad,

right? Well if you'd had spent nearly 2 weeks building a proper base only to find yourself halfway across the world, you'd be ****ing pissed as well.

Since that point, we've been very cognizant of what Manish is doing at any point in time. Also, Dhriti

ended up being sort of an encyclopaedia on Minecraft mechanics. When you think that this is her first time in the Overworld, it's something noteworthy. Also, the young lass has become a bit too chummy with the guys. So much that she even called Mithun "Mits"... once.

QUOTE OF THE MONTH

"What do you mean, huh?!"

- Mithun, on being told he doesn't criticise himself

DISCUSSIONS

Every month we will highlight some of the more interesting discussions happening on our Digit Forum (digitin/forum). Head over and join our forum if you want quick answers to your queries from some of the geekiest Indians online. In case you love giving gyaan, or even if you love arguing with others, the Forum is the place you should be.

Digit CTC VII

Although the competition is over, but you can still go through the trials and tribulations of all the people who participated in the seventh edition of Digit Crack the Code.
