DORORO

This is the story of a cursed boy who must fight demons to regain his humanity. Cursed before birth, the boy is born without limbs, no face, not even skin. So the boy is disposed. But he's saved by a medicine man, a man who helps him and teaches him how to live and defeat demons. With each demon he slays, he recovers a part of himself the demon took when the curse was placed on the boy. It's during

his journey of regaining himself that he comes across a young orphan boy, Dororo, who accompanies him on his journey to regain his humanity.

KAGUYA-SAMA: LOVE IS WAR

Not your typical rom-com, Kaguya-Sama: Love is War is the story of the President and Vice President of a school, who most certainly like each other, but neither is willing to admit it to the other. Why? Because apparently, admitting you like someone is a weakness and neither of them wants to appear weaker. This puts them in a lot of funny and awkward situations, with

both of them trying to get to the other to confess and establish their own superiority and dominance? Again, why? Love is war.

KIMETSU NO YAIBA

Ufotable's latest took everyone by surprise. Nobody really expected them to pick this up, it wasn't exactly an immensely popular Manga. However, what they've done with it is nothing short of amazing. The animation in Kimetsu no Yaiba is nothing short of gorgeous. The anime even features the unique artstyle present in the manga, which helps it stand out.

The show revolves around Kamado, whose family is murdered by a demon, and his sister, the only survivor, is turned into a demon. The anime follows his journey as he becomes a demon slayer and vows to cure his sister and take revenge for his family.

THE RISING OF THE SHIELD HERO

This wouldn't be an anime list without an isekai anime on it, would it? Fortunately, Rising of the Shield Hero offers a refreshing take on the isekai or other world genre to make it worth watching, or at least checking out. The main character, Iwatani, is brought to the world as one of four heroes. Of the four, the shield hero is considered the weakest. What happens next took everyone by surprise, but

that's basically what made the show worth watching, even if it did start to fall off towards the end. Check it out if you're a fan of isekai anime.

ONE PUNCH MAN SEASON 2

The second season of One Punch Man was facing trouble even before it was released, when it was discovered that Madhouse would not be animating the second season. Their animation was part of the reason the first season was so fantastic and highly acclaimed. However, despite this, the second season still turned out to be pretty good. Sure the animation wasn't as good as the first

season, but it was still good. Also, they further elaborated on the background of the various heroes on the roster, though we really wish we got to see more of Saitama just straight up one-shotting stuff with his fist. Come to think of it, Mob Psycho 100 and One Punch Man are both made by the same creator, ONE. We're thinking he must really like overpowered main characters...
