

Self-destructing Fortnite mechs

Possibly caving to the #removethemech pressure from fans, its mechs now drop and self-destruct in-game. <https://digit.in/oct19-27>

Facebook's VR social platform

Facebook announced Horizon, a virtual world where users hang out, play games and build their environment. <https://digit.in/oct19-28>

CRAZIEST POP CULTURE FAN THEORIES

Snape is a trans woman and Varys is a merman

Aditya Madanapalle | aditya@digit.in

O

ne of the favourite fan activities is coming up with complex theories that fit the facts. Many of the

theories in this list have been confirmed as canon by future releases in the franchises, or approved by the creators themselves.

BRAN THE FISHER KING

This is one of many ASOIAF fan theories and got lost in the noise

when it originally came out. However, it turned out to be the most accurate guess of the endgame, and correctly predicted that Bran would eventually end up ruling over Westeros. There were not too many dots to connect either, a Google search for Bran King straight up shows a character from Welsh mythology who is virtually identical to Bran. He is disabled and known as the Blessed Crow. Bran the Fisher King theory was originally posted on Westeros.org in 2015.

DUMBLEDORE IS DEATH

This is a really cool theory that even JK Rowling said is the one she likes the most. Essentially, according to the theory, Harry, Snape and Voldy are parallels to the three brothers

in the tale, Ignotus, Cadmus and Antioch. Ignotus is the “old friend” of death who has the invisibility cloak – the same invisibility cloak that passed down from father to son, and that Harry finally used. Cadmus and Snape both lose a lover who dies young. Voldy and Antioch are obsessed with increasing their power. Here is the kicker though – according to the theory, Albus Dumbledore is Death. Dumbledore is the reason why Snape and Voldy died, and finally met Harry as an old friend after Harry was killed by Voldy.

THE LINEAGE THEORY

According to this confirmed theory, William J. Blazkowicz, Commander Keen and Doomguy are all different generations in the same family. This is a theory that connects three classic 90s video game series, Commander Keen, Wolfenstein and Doom.

HAN SOLO IS A FORCE USER

Han Solo is eerily lucky in many situations. He can convince Huttese lords, gets lucky at cards, misses

bullets in close range, has impossibly fast reflexes while piloting the Millennium Falcon, and can fire on target while hanging upside down. If he was just wearing a robe, we would have ascribed all of this to his force powers, but just because the series never explicitly mentions this, does not mean that Han Solo is not a force user.

JAR JAR IS A FORCE USER

While Jar Jar might appear to be a bumbling idiot, according to this theory, he too is a latent force user. He clumsily stumbles his way through all kinds of situations against armed enemies, and still manages to survive
