

ANIME

Vinland Saga

★★★★☆ | As we move into the Fall season of anime, we've still got a few leftovers from the fantastic line-up in the Summer season. One such anime is Wit Studio's Vinland Saga. Wit Studio are the same folks behind the incredibly popular Attack on Titan anime. So, there shouldn't be any doubts about the quality of the animation. It's clean and smooth, top-quality stuff.

Vinland Saga also has a great story and great characters to boot. The pacing might seem a bit slow at times, but that's fine, every episode is enjoyable and keeps your glued to your seat. It makes you get behind the main character and feel for him and his plight. At the same time, you have conflicting feelings for some of the other, more morally questionable, characters are well.

The anime is set during the Viking era, in a time where the land to the far West, Vinland, is still imaginary. Nobody believes anyone who's claimed to have been there. In the anime, we follow the story of Thorfinn, the son of Thors, a great warrior, who vows revenge for the murder of his father. We watch him grow, train and get stronger, fueled by vengeance, but in conflict with himself, because of his father's teachings.

Like we mentioned above, the animation is great. The story is also great, and so are the characters. Definitely one of the must-watch anime this year.

TV SHOW

The Boys

★★★★☆ | The Boys takes the superhero "genre" and puts a twist on it. Most of the time, superheroes are depicted as powerful beings, who are righteous, loved by the people, and hold a lot of influence. Now Imagine, if all of the above still stands, except, instead of being righteous, superheroes are corrupt and abuse their powers.

This is exactly what The Boys tackles. How do you deal with rogue superheroes when you haven't got powers of your own? Well, the answer is with a rogue agent who has a vendetta against them apparently.

This is a world where superheroes pretty much rule the world. They may not literally be in a position of power, but they're popular enough to sway the masses. They're driven by fame and merch sales, and saving lives is on the back-burner.

The methods they use to deal with the supers is pretty interesting. The entire premise of the show kind of took us by surprise, the good kind of surprise. Of course, if you went in knowing what you were going to watch (if you've read the comics) it isn't that surprising. The events of the very first episode are enough to get you hooked, and the character development of one of the lead characters, Hughie, as the season progresses is great. Karl Urban does a fantastic job in his role as Billy Butcher, and just overall, the cast for the show was pretty great.

The Boys is actually a rare treat, a series that actually delivers and was fun to watch from start to finish. Here's hoping for season two.

UP AND COMING

MOVIE

Joker

Joker is an origin story of sorts, the story of Arthur Fleck, before he became the iconic arch-nemesis to

Batman that we know so well. This is an R-rated character study you don't want to miss.

Release date: October 4, 2019

MOVIE

The Addams Family Movie

The Addams Family is back! And making their way to the silver screen. From the trailers it looks like they're sticking

to the original character designs. Hopefully it stays that way.

Release date: October 11, 2019

MOVIE

Zombieland 2: Double Tap

Sequel to 2009's hilarious horror-comedy zombie film Zombieland, Zombieland 2 continues the

tale of the four strangers who've now become friends in a post-apocalyptic zombie-filled world.

Release date: October 18, 2019
