

SECURITY WATCH

Security flaw detected in Justdial

A crucial security flaw has been detected in the popular local search engine, Justdial, which may have given hackers access to almost 156 million unique user accounts. The security bug was found by a security researcher, Ehraz Ahmed, in Justdial's Register API, as reported by Moneycontrol. This flaw could allow a potential hacker to log in to any Justdial account and alter account details for Justdial Pay, thereby redirect any money that gets sent into that particular account.

Ahmed posted a video that showed this bug. Upon entering the JD customers' phone numbers as the username, the system would return an access token, system ID (SID) and user ID (UID). With the SID, the hacker can access the user's JD account and the UID lets them post on the user's social profile. Justdial acknowledged the existence of this bug and stated that the flaw was fixed with allegedly no loss of data.

MOBILE WATCH

Vivo Nex 3

Vivo's NEX 3 has been unveiled and boy, is it a beauty. The NEX 3 will come in two variants - a 4G and 5G model. Powered by a strapping Qualcomm Snapdragon 855 Plus SoC, the base model comes equipped with 8GB of RAM and 128GB ROM, while the more-expensive variant comes with 256GB internal storage. The most striking feature of the smartphone is the 6.89-inch POLED (Plastic OLED) Waterfall FullView display, which features extreme curves on the sides with an astounding 99.6 per cent screen-to-body ratio. The phone sports a 64MP primary shooter, a 13MP wide-angle sensor and another 13MP telephoto lens. There's also an 'elevating' or pop-up 16MP selfie camera. You can expect the Nex 3 to hit Indian markets sometime in November or early December, with an price tag of ₹50,990 for the base variant.

APP WATCH

Vivaldi Browser Beta

Vivaldi browser, the brainchild of Opera's co-founder Jon von Tetzchner, should be on your radar if you really like tinkering with your browsing experience. Now, Vivaldi is bringing a beta version of its browser to mobile, specifically Android devices. The app is feature-laden and existing Vivaldi users will probably recognise most of these features. First in the list is easy bookmark management. Vivaldi has termed its bookmarks as 'Speed dials' and they're

basically tiles displayed on the top of the browser, below the URL box, to allow users to easily access their favourite websites with a mere tap. The 'speed dials' can also be organised into folders such as news, social, sports, technology and more. Additionally, if you're al-

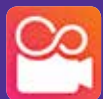

ready using the desktop version of the browser, all your bookmarks will be imported automatically once you sign in. Vivaldi also features a navigation bar at the bottom of the app which is

comprised of back and forward history buttons, a shortcut to panels consisting of bookmarks, notes, downloads and history, and also a useful tab switcher.

Apart from using the nav buttons to swipe and toggle tabs, the mobile browser also features multiple options for tab management. Users can create clones of existing tabs and review recently-closed tabs as well. Dark mode is also available for all you 'dark mode' lovers. There's also an option to capture a screenshot of the visible area of a webpage or even the entire webpage through the capture page option which resides in the menu. Vivaldi Browser Beta also has a unique Notes feature which lets you create notes within the browser page itself which can come in handy when working on projects that need you to extensively research on the internet.

Firework

Firework is a social mobile video app. It has a patented feature called 'Reveal' which lets users twist the phone into landscape mode from portrait to watch the video from a different perspective.

Piano by Yousician

Piano by Yousician is a nifty little piano learning app with options of free and paid plans. The keys of the piano are colour-coded which makes it easy and intuitive for beginners to use.
