CALLING WPS OFFICE AN ALTERNATIVE TO MICROSOFT OFFICE is seemingly inadequate, seeing that it pretty much mimics the entire look and feel of MS Office and adopts an array of its basic features as well while adding some useful novel features. WPS Office can be used for free, however, you will be subject to a fair share of ads during your usage, but its nothing too unmanageable. The office suite comprises of a word processor, spreadsheet and presentation tool mimicking Word, Excel and PowerPoint. This user-friendly office suite is packed with features and is fully compatible with MS Office documents which facilitates easy sharing

with Office users. There are also free versions of WPS Office for Linux and Mac systems, as well as a free WPS Office app for Android and iOS devices. However, we will just be looking into WPS Office for Windows in this Level Up. Here's a list of lesser-known tips and tricks for WPS Office.

PARAGRAPH LAYOUT MODE

WPS Office has a distinctive paragraph adjustment tool that allows users to modify the characteristics of paragraphs intuitively by simply using the mouse instead of having to go through multiple arduous steps to do the same. To enable 'Paragraph Layout' mode, head over to Home > Show/Hide Editing Marks > Show/Hide Paragraph Layout. Click on this and then highlight a paragraph. You'll see an icon pop up on the left side of the paragraph that looks like a bookmarked paper. Click this icon and you will enter

paragraph layout mode. You can now drag and alter paragraph characteristics such as first-line indents, left and right paragraph indents, line space between paragraphs and more. The paragraph layout tab has other options such as line spacing and character spacing.

such intricate details. Note: This feature is only accessible to users who have upgraded to the premium version, however, there is a free 30-days trial you can utilise.

To achieve this, first launch WPS Office suite. In the taskbar on the left-hand side, you will see 'App

You can use your mouse to drag and alter paragraph spacing, line spacing and indentations

PDF CONVERSION AND EDITING

Editing a PDF file and converting it to different formats can be quite a cumbersome process. WPS Office has an inbuilt PDF converter that lets users change PDF files to Word, Excel or even PPT files, just by following a few steps. The converted file will attempt to resemble the original PDF as closely it can, ensuring the usage of the same fonts, paragraph, character spacing and other

Center' under which you will find 'PDF to Word'. Click on that option and then drag and drop your PDF file in the pop-up box or click to look through your files and open the PDF file. Once you have added the PDF file, click on the green 'Convert' button. The file will then be converted to a Word doc and you can easily edit it now. You can also similarly convert PDFs to Excel or PPT files. WPS Office also recently added the ability to
