Alice Finch and David Frank, a pair of LEGO enthusiasts recreated Elven realm from the Lord of the Rings series, Rivendell, using 2,00,000 LEGO bricks in 2013.

LEGOLAND Dubai features an ultra-realistic replica of the Taj Mahal which they unveiled in 2016. The structure consists of 2,80,741 LEGO bricks and took an obnoxious 2,019 hours to build.

The LEGO company actually hired workers to build this life-sized X-Wing starfighter straight from the Star Wars films. It consists of an astounding 5 million LEGO bricks and weighs 45,000 pounds!

This giant-sized Batman Batarang is made to appear as if it crash-landed on Observation Point in London's South Bank. The structure was created by LEGO design company, Bright Bricks.

This is a replica of the Allianz Arena in Munich complete with thousands of tiny LEGO fans in the stadium. The structure can be found in LEGOLAND Deutschland Resort.

Top Gear's, James May, assembled a full-sized LEGO house in 2009 complete with working sinks and taps, a functional toilet and a very uncomfortable bed... Unfortunately, the structure was torn down later the same year.

From the LEGO masters at LEGOLAND Center in Boston, we have a life-size giraffe structure. The structure was named Gio in honour of a six-year-old, with the same name, who succumbed to a congenital heart disease.
