

Tackle a climate change denier

Here is a list of links to articles that can be used to refute skeptical arguments against climate change <https://digit.in/dec19-71>

Everyone in one time zone

What would happen if we abolished time zones, and all the clocks on Earth ticked in unison? <https://digit.in/dec19-72>

FEEDBACK FOR THE NOVEMBER 2019 ISSUE

Send feedback to editor@digit.in | join us on telegram - t.me/digitgeek | or on discord - discord.gg/MyD8Xvt

Hello Robert,

Finally I received my November issue yesterday late afternoon. First of all, very sorry to hear about the passing of your good friend, and also thank you for publishing my letter.

I remembered the courier man, he had delivered an amazon parcel few times, and when I was supposed to return a parcel he refused to take it saying that he was going home and would come tomorrow, but he never came. It seems they are freelancer delivery men who deliver multiple companies orders and prioritize amazon, flipkart, etc over magazines.

I thought it would be several months before I had anything useful to write to you.

As you know, I subscribed for the magazine-only option, and it would be helpful to know what I have missed in skoar and fast track and demystify, etc. The contents of the dvd are mentioned, but I don't think the contents of the fast track, etc are mentioned. Only by looking at the photo on page 12 I could tell that I have missed out on reading about archaeology and electronics.

Coming back to the untimely passing of your good friend and boss, and only meaning this in an encouraging way, I think it is very, very, important to make people aware of how eating bad foods can severely and permanently damage

us. I too was in terrible shape and had fainted almost 3 times and couldn't stay awake after having a meal. My condition only and only improved after I started eating clean. I think it is a duty to inform the young generation how extremely harmful the food they eat is. Encouraging people to eat clean and hitting the gym even occasionally will help them lead happy and productive and long lives.

I hope this is not taken as criticism and only as encouragement.

And as a final point, it still gives me a sense of excitement even now at age 41 to receive my copy and open the plastic and see all the various topics that will be covered this month.

—Sarosh Doctor

PS: Here's my journey to fitness in pictures:

d Thank you for writing in again Sarosh. It's amazing what you have done for your health, and we are sharing

the pictures you sent as a way of trying to inspire more readers (and us as well) to start taking care of our own health.

—Robert

Dear Booman, thank you for your article in Nov. issue. Best of articles. You show the mirror to people. I respect your subscribers who claim to have started reading the magazine so early in life. Reminds me of the joke of a man claiming as earliest memory, - going to picnic with his father and returning with mother. Articles are written with eyes on laptop screen. So 'Jugnu' is not mentioned even in passing in an article of bio-luminescence, after all it is marine variety the article talks about. Only, my doubt is no body is any longer bothered to look for such critters on a dark night, - glued as they are to their mobile's screen.

Carry on Sir, regardless.

We enjoy.

—Santanu Choudhuri

Thanks for your feedback Santanu. The article did mention fireflies, however, it did largely surround marine life. The screens have truly trapped people in their snares. Perhaps they can turn the cameras towards the critters to snap the perfect Instagram shot...

—Dhriti

Hi I had these pile of dmystifys that I hadn't touched yet. Last week I started reading some of them and have today I am reading the 7th one. Yeah 1 per day. It's really fun. I would like you to recommend me some books on chemistry, physics, math, stuff like game theory, string theory etc. I want something like an encyclopedia. Whenever you say 'beyond the scope of this book' I thought to buy a book related to this topics but just couldn't find something amazing as dmystify. Can you guys recommend me something similar with all the stuff together. Thanks in advance

—Milan Muhammed

We would recommend The Universe in a Nutshell by Stephen Hawking.

—Aditya
