Sennheiser Momentum Wireless 3

Weighty sound profile at odds with the status quo from Sennheiser

The Sennheiser Momentum Wireless 3 are a pair of luxurious wireless headphones. The opulence is obvious since they are priced at ₹34,990 which is higher than the wireless headphones offerings from Jabra and Sony, and cost a tad bit more than the Bose NC 700. Let's see if their performance justifies the price.

Build and design

The Sennheiser Momentum Wireless 3 comes in a stout, cylindrical case with a coarse cloth material that looks and feels premium. However, most other brands, at this price point, include a hard case which is far more secure. Within the box, you get a USB-C charging cable, a Type-C to USB A converter and a cable for passive usage. Coming to the headphones itself, Sennheiser sourced genuine leather for the headband and memory foam in sheepskin leather for the ear cups. Long, matte stainless steel arms extend down the ear cups from the headband which have a slick sliding mechanism to get the right fit. The cups fold inwards but they do not fold down flat. The cans are rather robust too. We tugged the ear cups apart pretty hard but there were no signs of creeks or squeaks. The clamping force is adequate but not restrictive.

Features

The Sennheiser Momentum Wireless 3 sports three ANC modes - Max, Anti Wind, and Anti Pressure. It features Bluetooth 5.0 connectivity. There are zero lags and skips in tracks. The headphones have ditched the power button and employ the action of folding and unfolding the earcups to power on/off. Once you finish pairing, merely opening the headphones connects them to an already-paired device and resumes music. The cans also incorporate an auto pause/play feature. The Sennheiser accompanying app - Smart Control - features

Price
₹34,990

an adjustable EQ, ANC controls and Transparent Hearing controls. Transparent Hearing amplifies the sounds around you using the mics present in the cans. The cans also offer support

for hi-fi codecs. Other features include Voice Assistant access, Tile tracker integration and a 17-hour long battery life. The battery life is disappointing since some competitors offer as much as 34 hours at a lower price.

Controls

Four rubberised buttons are present on the right ear cup as well as a toggleable button. The toggleable button can be pushed up to turn ANC off, pushed down once to switch ANC on and pushed down again to turn on Transparent Hearing mode. Three buttons in the middle control music playback. The middle button can pause/play music or answer a call with one push. Pressing the middle button twice takes you to the previous track and thrice brings you back to the previous track. There are no volume controls, which is disappointing.

Performance

The Sennheiser Momentum Wireless 3 surprised, no, disappointed us with its

weighty sound profile. In *Another One Bites the Dust* by Queen, the bass response is quite accurate, but can get slightly overbearing. The lows are weighted and tracks such as *I'll Keep Coming* by Low Roar sound muddled. The mids are well-balanced. Unfortunately, the jarring lows cause some auditory masking in the mids leading to vocals sounding veiled. *Popular Monster* by Falling in Reverse falls prey to auditory masking discernibly. Where these cans shine is upper mids and the highs Josh Kiszka's striking vocals in *Safari Song* by Greta

Van Fleet sound superb. Imaging on these cans is stellar, soundstage,

however, was a bit of a miss. Coming to ANC performance, we found it to be lacklustre, especially when compared to ANC monsters such as the Bose NC 700 and Sony WH-1000XM3.

Bottomline

The Sennheiser Momentum Wireless 3 are a decent pair of headphones which stand out due to the comfortable fit and intuitive features. The sound profile is warm and the lows are quite weighted which veils some details in the mids and vocals. The highs, however, are reproduced quite exquisitely. The premium price tag calls for perfection and while the ANC is certainly decent, it doesn't compare to competitors from Bose and Sony. Nevertheless, the headphones are not bad by any measure, but the price tag makes them hard to recommend.

—Dhriti Datta

SPECIFICATIONS

FREQUENCY RANGE: 6 Hz - 22 kHz | BLUETOOTH VERSION: Bluetooth 5 | NFC: Yes | AUDIO CODEC: SBC, aptX, aptX Low Latency, AAC | AUDIO INPUT: Bluetooth, Analog (mini jack), USB-C | BATTERY SPECIFICATION: Lithium rechargeable | USB STANDARD: USB-C | BATTERY TIME: 17 hours | ANC: 3 ANC Modes | APP SUPPORT: Sennheiser Smart Control | WEIGHT: 303.3 g | WATERPROOF: No | WARRANTY: 2 years
