

digit diary

If you are ever curious about what the **Digit gang is up to**, this is the place to get all the inside info. From the **latest game we're obsessing about** to the newest intern we're driving up the wall – it's all here folks.

We're finally done with the 19th Zero1 Awards and this time around we made it a little special by holding the first ever Zero1 Awards ceremony. A lot of brands and Digit Squad peeps got invited to what was a very successful event. After the torturous month of November, we finally got a few days of relatively less work. So what did we do in that time? Play games, of course. We've even started livestreaming again, this time it's on YouTube. Thus far, we've played a few League of Legends matches and started a new world in Terraria. The latter being similar to Minecraft has some of us worried. The last time we started playing Minecraft, we got sucked into it for a pretty long time. Terraria is just as interesting and sandbox-y to allow for countless days of entertai... dammit! It's too late, we have initiated construction on Base 1.0 and the dungeon raids have commenced. Tune into our YouTube page for all the latest happenings in Terraria.

Everyone's going gaga over The Witcher Netflix adaptation. Except for Andrew, we don't know what his beef is with the show. Most of us blitzed through the entire season in a couple of days. Yes, we took our sweet time analysing and re-analysing each episode as we went through them. **The Council has decided that Henry Cavill shall forever be the one true Witcher henceforth for he was born to play the role.** Also, some of us have suddenly developed the urge to play the Witcher games all over again. Don't know if there's a link between the two but who knows. Also, we might stream that as well.

It's been a while since we've updated you peeps about the rat situation over here in the office. Well they've ramped up their offensive ever since winter began and they've been leaving little gifts for us to discover every morning. Dis-

covering a few drops of excrement here and a few drops there every morning has become the norm. Some scattering of papers and boxes can be witnessed every now and then. It appears they've managed to find multiple new routes to enter the Test

Centre. We've placed orders for a fresh batch of wire mouse traps and glue traps. A fitting response shall be given in return, this, we promise you.

The Telegram group meanwhile had a long discussion on the various uses of the letter K. It started off from some what K means in Y2K, which was the letter to designate the SI prefix of kilo, or a thousand. K can also be your crush's reply to a long, well thought of message, the key or black colour in CMYK, the Boltzmann constant, potassium and kelvin. It also means "what" in Haryanvi and "who" in Bengali. This is truly one versatile letter.

QUOTE OF THE MONTH

"K"
– Edward Snowden

DISCUSSIONS

Every month we will highlight some of the more interesting discussions happening on our Digit Forum (digit.in/forum). Head over and join our forum if you want quick answers to your queries from some of the geekiest Indians online. In case you love giving gyaan, or even if you love arguing with others, the Forum is the place you should be.

Best games (2000-2009)

This is actually a good time to have the discussion now, as we have had a decade to play the games that were released in the late 2000s.

Disposing e-waste

Find out recommendations for the environmentally responsible way of getting rid of your old phones and other electronic junk lying about.

<https://digit.in/ewgo>

Buying a gimbal

Forum user billubakra wants to help his friend buy a gimbal for a smartphone without OIS, and the members help him make a smart choice.
