ANIME

ROUND-UP

2019

All the anime that was worth watching in 2019

Manish Rajesh | manish@digit.in

We know, "It's 2020, why are there 2019 anime in my 2020 magazine?!" Well, all the fresh animu only start airing later in January, and we're not in the business of foresight. We can make guesses but honestly, we'd get nowhere, considering the ride 2019 was. Hype was built only to crash and fall, and surprise hits ruled the year. Speaking of 2019, with hundreds of anime airing (as they do every year), we've gone ahead and made a compilation of every anime that we think was worth checking out in 2019. Lucky for you, by the time you read this article, everything on this article should have completely finished airing, so you can binge them all in a single sitting.

Since we already covered the first half of the year in a previous article, we'll just mention them in brief here again, so you have everything in one place for convenience. Starting things off with the Winter anime.

WINTER 2019 ANIME

(JANUARY - MARCH)

Tate no Yuusha no Nariagari

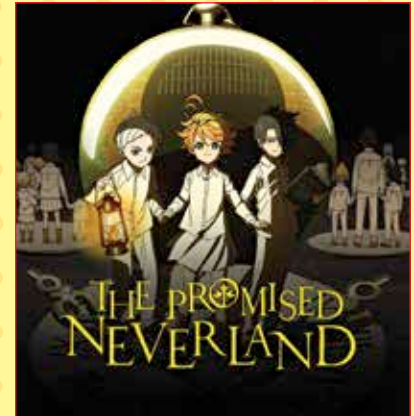

The Rising of the Shield Hero is an interesting take on the popular isekai genre, although it does eventually fall

into the usual isekai anime tropes, it's not a bad watch. We'll explain the isekai genre once, since you'll be seeing a few more of those later on in this article. The literal translation is "different world" or "another world". The idea is simply that the main theme or setting of the anime involves the main character(s) being transported to a different world from their own, usually a world of fantasy.

Yakusoku no Neverland

Among the highest rated anime of the season, The Promised Neverland revolves around three children, Emma, Norman, and Ray, of Grace Field House orphanage. They're provided with

everything they could ask for, but are prohibited from ever leaving. When they accidentally witness something they're not supposed to, the dark truth of Grace Field House orphanage is revealed.

Mob Psycho 100 II

If you're a fan of overpowered MCs (main characters), then you'll definitely want to give Mob Psycho a whirl. Kagiyama (the MC), is an 8th grader who doesn't look like much or stand out a lot, but he's secretly the strongest psy-

chic. Ever. This wallflower is also a very endearing character, and watching him balance being a powerful esper with the mundanity of being a high-school student is pretty entertaining.
