Best anime episodes 2019

This is a list of the very best episodes from different series over the previous year. <https://dgit.in/jan20-28>

the old animation was definitely missed, One Punch Man 2 didn't disappoint, at least, it didn't disappoint us. We get further insight on the other heroes of the series in S2.

Shingeki no Kyojin 3 Part 2

Attack on Titan is probably the most well known title on this list, maybe even the first anime many of you ever

watched. Part two of the third season of Attack of Titan takes the story further, taking us closer to the secret of the origins of the Titans.

Fruits Basket (2019)

Fruits Basket is a popular Shoujo manga that was first adapted into an anime in 2001 and got a fresh adaptation in

2019. Due to unfortunate circumstances, the MC finds herself adopted into a family, however, they have a secret. Don't worry, not the sinister kind. They turn into zodiac animals when hugged by the opposite gender.

We're at the halfway mark, half a year of anime still left to go. Plenty of good stuff still left, with the majority of the popular sequels still to follow.

SUMMER 2019 ANIME

(JULY - SEPTEMBER)

Dr. STONE

Fantasy vs Science. Okay, it's definitely full-on fantasy but the premise is nice. It's 3000 years in the future, and humanity has had to start over because of a virus that turned the majority of the population into stone. Senku (the MC) breaks out of his petrification three millennia in the future

and vows to take Earth back to the modern age, and go even further. Of course, it's not just idle talk, he's got the brains to back him up. Dr. Stone is a great watch, and as a plus, you'll learn more about science as you watch. Season 2 confirmed for 2020.

Enen no Shouboutai

The premise of Fire Force is hard to ex-

plain. People in this world spontaneously combust. In these scenarios, a special firefighting team is called in, which also doubles as a team of exorcists. They've got a firefighting nun and everything. Oh also, each of the members of this firefighting squad have fire-based powers of their own. If that piqued your curiosity, you can learn more why people are randomly catching on fire and need to be exorcised after watching the anime.

Vinland Saga

Our personal favourite anime of the year, Vinland Saga is an anime that revolves around the Vikings. While it takes some liberties when it comes to realism, it does make an attempt to maintain some historical accuracy. The series is based on two Icelandic sagas, the Saga of Eric the Red and the Saga of the Greenlanders. The anime itself follows the MC

Thorfinn, who's set for revenge after his father is murdered right in front of him. In addition to an MC you can get behind, Vinland Saga features a host of interesting characters, some of which you'll despise, and some you can't help but root for. Definitely a must-watch.

IT'S SEQUEL CITY WITH THE FALL 2019 ANIME

(OCTOBER - DECEMBER)

Boku no Hero Academia 4

My Hero Academia is a textbook Shounen anime, a really good one at that. When it first released in 2016 it
