

A year of theatrical anime

The surprise success of *Your Name*, by a new director saw a number of anime films released in 2019. <https://digit.in/jan20-29>

Anime before manga

Sometimes, the anime actually comes out before the manga, and here is a round up of those occasions. <https://digit.in/jan20-30>

took the world by storm, and three years later the excitement is still strong, and so is the show. The fourth season of *My Hero Academia* continues where the last

left off, as we see our MC Deku further mature and grow stronger. There's been a lot more focus on supporting characters this season, which we've really enjoyed so far. The anime is still airing will continue into 2020. Likely with another season later in the year.

Sword Art Online: Alicization - War of Underworld

Ah. *Sword Art Online*. *SAO* is an interesting topic for anime fans. You either love it or hate it with a passion. You could say

there's a visible rift. Regardless of that, if we had to give an unbiased opinion about *SAO: Alicization*, we'd say it's actually not bad. Just like we thought the first half of the original *SAO* was amazing, but the second half was complete garbage. The story still features main man Kirigaya Kazuto (Kirito) getting

stuck in a fictional world, but the approach is a little different. And so far, well executed. Well enough to warrant us telling you to give it a chance.

Shinchou Yuusha: Kono Yuusha ga Ore TUEEE Kuse ni Shinchou Sugiru

Cautious Hero: The Hero Is Overpowered but Overly Cautious (these names are getting ridiculously long!) is another Isekai anime on the list, but it wouldn't

be here if it wasn't half bad. It's almost a parody of the Isekai genre, and takes every chance it gets to poke fun at it. The MC, Seiya Ryuuguuin, also stands out as an Isekai protagonist. The show isn't all comedy though, and has its grim moments. It's also chock full of fan service. You've been warned.

Shokugeki no Souma: Shin no Sara

The fourth season of *Food Wars* (food-gasm the anime) brings with it a lot more out of this world cooking, food that

you wish you could eat, dragon ball Z levels of suspense, and excessive food-gasm. Which is what happens when you eat the food in this anime because it's apparently good enough to induce mad levels of pleasure. This'll be a hard one to explain if you're caught watching out of the blue (that's an NSFW warning). The story continues where it left off in the previous season, with the rebel chefs trying to reverse the expulsion of their friends. A fifth season has already been confirmed for next year.

ANIME MOVIES

Tenki no Ko

Makoto Shinkai's *Weathering With You* is often compared to 2016's *Kimi no na wa* or *Your Name*, which shouldn't come as a surprise since he made both. And he's hit it out of the park again with *Tenki no Ko*, delivering yet another touching and heartwarming story. With

gorgeous visuals and animation to boot. The story revolves around a young boy who runs away to Tokyo and befriends a girl who can supposedly ensure clear skies on demand. The two start up a business together, where they go around giving clear sky conditions to those who need it on demand, their customers being everything from young school children to megacorporations. Like with *Your Name*, there's some magic at play here, which isn't the main attraction of the movie, but definitely enhances the overall experience, like it did with *Your Name*.
