

NO EXPENSE SPARED

Samsung Q950TS 8K TV

Just like last year, Samsung showcased their “The Wall” which had grown much larger this year with the biggest size on offer being a whopping 292-inches diagonal. Up until now, The Wall was only a

showcase product but it has since then matured to be offered as an actual product. What's more closer to reality are their Q950TS 8K OLED TVs which are expected to hit the shelves within a few months. The only thing that remains is to find 8K content for these new TVs.

LG OLED TV R9

LG showcased their roll-up TV last year but there was no shipping date in sight. Apparently, that changed this year with the OLED

TV R9 about to ship in 2020 with a jaw-dropping \$60,000 price tag. The foldable TV has now been improved to have better imaging, far-field microphones to pick up voice commands from across the room and it comes equipped with a better processor.

BrainCo's AI-powered EMG Prosthetic Hand

Most of the details of the HTC Vive Pro Eye are shrouded in mystery. We know that it has eye tracking to enable foveated rendering, can work wirelessly and is focused on a more broader audience. The eye tracking also serves as an input which can add a whole new dimension to the possibilities within a VR system. This is one thing we're very excited to hear more of.

Lamborghini Huracan Evo with Amazon Alexa

A Lamborghini Huracan Evo is something that few of us can ever own in our lives, and should you be one of the lucky few to ever do so this year, you can now enjoy the company of Alexa. Echo Auto was unveiled at CES last year but with just one partner, it seems that the ecosystem has found a new home in the exotic \$300,000 sports car.
