

### PRASHANT CHAUHAN

Ms Ramaiah Institute of Technology  
Electronics and Telecommunication, 4th Sem

My areas of interest include ethical hacking, new technology trends, computer networks, PC games, and electronic circuits. I have a passion to be an ethical hacker and love discovering new technological developments which can catalyze the cybersecurity sector. I am also a gamer and a big fan of COD games, and especially fighter simulation games. Hawx has been my all-time favorite game.

### SHIVAM SAH

Kumaon University | BCA, 6th Semester

Growing up video games played a vital role in my development, they fascinated me from a young age. As I grew older, my affinity towards tech, in general, grew. I dived headfirst into programming in my teen years, the feel of printing my first "Hello World" is the one I still remember quite vividly. As I grew comfortable with programming, I started exploring other areas as well.

### GOKULAKRISHNAN THANIGAIKUMAR

SSN College of Engineering | B.E (E.C.E), 6th Semester

Future engineer, Total computer geek. Looking for dark matter, but not finding any. So, now I build computers and I love it. Sarcasm falls out of my mouth but I am not actually funny. I am just really mean and people think I am joking. Just kidding, I'd love to talk about computers, mobiles, games, astronomy, pop Music, Sci-Fi Movies, memes, Robots, and Octopus.

### ABHISHEK BHATI

Jaypee Institute of Information Technology, Noida  
B.Tech. (Computer Science and Engineering), 6th Semester

I am a technology enthusiast who loves to understand the working of various devices along with the best capabilities that the latest devices in the market have on offer. Knowing about the working of tech companies, their management structure, and the operational activities is also an area of deep interest for me. I am passionate about blockchain technologies and the applications of AI.

### SUMAN SAURAV

Techno Main Salt Lake | Mechanical engineering, 4th Semester

A techie by passion and future engineer by profession. Apart from being an engineer, I love interacting with new technologies and thus Digit has been a great platform for me. I do have peerless love for technologies and I believe that the coming era will be of digital technologies. I want my career to revolve around technologies as I believe that the 'Power of Technology' will change the whole world.
