OnePlus extends warranties

In light of the COVID-19 pandemic, OnePlus extended its warranty coverage and return durations. <https://digit.in/apr20-90>

FEEDBACK FOR THE MARCH 2020 ISSUE

Send feedback to editor@digit.in | join us on telegram - t.me/digitgeek | or on discord - discord.gg/MyD8Xvt

I have been an avid follower of your website and magazine for years. While I am no longer subscribed to the magazine, I do visit digit.in and it's great to see you guys grow. I have been practicing my writing and wanted to know if I can submit my articles for possibly publishing on the site.

—Dhruv Ahuja

It depends on the subjects you write about, and the skill you display. If you, or other readers want to try your hand at writing for us, we're happy to help you through the process, and copy edit your work as well as publish it. Just write in to

editor@digit.in, address either Mithun or me in your email, and tell us what your areas of interest are under the science or technology topics, and if you have a story idea or ten, mention those too.

—Robert

Hope you're doing well during these times. It's no surprise that schools are given a holiday for COVID-19, but I saw that as an absolute win. Like any otaku, I decided to catch up on my anime because I was WAY behind. I ended up finding a website that let me watch anime (and no, it's not kissanime). But, then it decided to act up and not be

compatible with iOS. Right when all hope was lost I realised there were a bunch of anime on Netflix. But then I realised that Netflix translates the dub wrong, so GG Netflix.

If you have any idea about any sites and could share them, that would be highly appreciated. I also made my mum sit down and watch My Neighbor Totoro and honestly - who can resist Studio Ghibli's charms and aesthetics? She loved it. Next up on my watch list is Demon Slayer, Konosuba, Miss Kobayashi's Dragon Maid and I'll try to finish Fairy Tail. If you have any anime suggestions I would appreciate if you could send them to me!

—Kashika

Hey Kashika, I know the feeling of falling WAY behind on anime, it is unfortunately not a feeling the rest of the folks here at the test labs share with me. :P I personally don't watch anime on my phone, but honestly, your best options to watch them on your phone are paid, such as Crunchyroll and Netflix. I came across the same problem as you regarding the subs on Netflix, and still stick to Kissanime for my anime-watching needs, with an adblocker on that is. Studio Ghibli movies are truly great! Looking at your watch list I see a trend of fantasy anime, so you could check out Overlord, Log Horizon, and GATE.

—Manish

Letter of the Month

Hi digit! I've been an on and off reader of the magazine since 2011. I had a lot of things happen in life, both good and bad. And every single time, there was a Digit magazine inside my bag with me. I never had a subscription to the magazine and there was only one place where I could buy Digit and that was the railway station. Digit always cheered me up. Your way of writing and the amount of knowledge packed inside this book is amazing! I am an architect now who has no connection to the tech industry. But my love of tech and science is still burning thanks to you guys. OMG the DVDs... the DVDs

were what got me introduced to Digit in the first place! For someone who didn't have proper internet, all that gold inside the DVD, it was a big thing for me. It still is! I know I can get all the stuff inside the DVD online but I still turn to the DVD anyways. I have no suggestions or complaints for you. I only have love for team Digit!

—Ferdinand Lopez

Thank you so much for your email. It means a lot to us when long term readers share their experience with us.

Send us your postal address and phone number and someone will be in touch with you to offer you our mystery gift for being letter of the month – once the global madness of the pandemic dies out, of course.

—Robert
