WE'RE ALL WITNESSING A COLOSSAL SHIFT IN THE WORLD WHERE SOCIAL DISTANCING IS THE NEW NORM, paving a way for new practices (for most) such as work from home. This

has brought on widespread adoption of video conferencing apps across the globe to not only facilitate working from home but also to stay in touch with family and friends. Apps such as Zoom and Houseparty have existed in the app stores for several years now, however, they

are witnessing a boom in their popularity now, ever since the onset of the novel coronavirus pandemic. There are multiple popular video calling apps available across platforms (PC, Android, iOS), nevertheless, some of these apps do not have the most user-friendly UX designs. Therefore, users often miss out on utilizing some handy but lesser-known

features on these apps. To that regard, we've compiled a comprehensive list of tips and tricks for some popular video conferencing apps that will heighten your video calling experience.

Note: We haven't included some popular apps such as WhatsApp and Facebook Messenger since the video calling feature is relatively basic.
