Exploring the world of Cosplay

It's not just playing dress-up, it's art

Manish Rajesh | manish@digit.in

Cosplay, or “costume play”, has been around for quite some time now. Here in India, we could say that it's still in its nascent stages, but it's growing pretty fast here too. Today, cosplay is more than just a hobby for many, it's a lifestyle and a choice of career. Even if you aren't familiar with it, we're sure you've definitely heard of it. It's quite prevalent in society today, and is more mainstream than it has ever been. Let's take a closer look at the world of cosplay.

Forrest Ackerman and Myrtle Douglas are considered the first to start the 'costuming' trend to conventions.

The term 'cosplay' was coined in 1984 by Japanese Reporter Nobuyuki Takahashi, after he had attended the Worldcon in Los Angeles. He used the term cosplay instead of masquerade. Because he thought saying someone was “masquerading as [insert character name here]” was too old-fashioned.

COSPLAY TODAY

Today cosplay is a huge subculture of its own. In countries such as the USA and Japan it's not that odd to see people in cosplay on the streets. It's still an odd sight here, but we're guessing it won't be sometime in the future.

There are no longer limits to what people portray as well, as pretty much any and all categories are fair game. TV series, movies, cartoons, anime, video game characters, there's cosplay for it all.

A BRIEF HISTORY

Cosplay can actually trace its history back to almost a century ago! 1930 to be exact. Only, it wasn't called cosplay then, it was 'costuming'. People weren't dressing up as characters, but there was a theme of sorts that people followed, i.e. futuristic, punk etc. This is only in terms of wearing costumes to large gatherings or conventions. Dressing up for festivals like halloween or fancy dress parties was still practiced before then.

Of course, cosplay really took off in Japan, with fans eagerly dressing up as their favourite characters from popular anime series like Mobile Suit Gundam. This idea of dressing up as characters soon spread around the world, and became the kind of cosplay we're familiar with today.
