Dear Team,

I just want to give you guys a suggestion, in India we don't have decent gaming channels, we do have pc and mobile gaming channels where they play or stream games, I'm talking about proper console gaming channels, where we get good gaming news, reviews, gaming event reviews etc. Your YouTube channel has pretty good potential for it...

Recently, we had the Sony Playstation event, Ubisoft Forward and we have an upcoming Microsoft exclusive gaming event. You could share your thoughts on them.

I'm 27 years old and I'm really into gaming and I'll be happy if you fill in the gap for India.

Thanks and regards

—Gnanateja Naikwade

Hey Gnanateja,

Believe it or not, we are working towards improving our gaming content and we have very big plans for the eSports scene with our upcoming SKOAR! College Gaming League as well. Stay tuned, we have massive plans for gaming.

—Manish

Hey Shail,

Thank you for the valuable feedback. The Government is working towards a similar move via legislation so your suggestion could very well become ubiquitous very soon. Secondly, we do have a response mechanism on the contact form, we'll reexamine the same to see if there's a glitch.

Letter of the Month

Hello Editor

I am an on and off reader of your amazing magazine. Owing to the nature of my job and remote areas of posting I rarely get hold of your magazine. So when I reached an area with connectivity the first thing I did was to try to get a subscription. Any technical threshold I have is all thanks to your magazine.

Firstly: when I contacted your team for assistance to subscribe the reaction was swift. They walked more than the requested steps with me. I am sanguine for that. That is

a fabulous customer service (I have to confess that I leveraged max out of the fact that I am a fauji 🇮🇳).

Secondly: The first copy reached me fast and that too well packed. Thank you. It was a great feeling to hold the magazine.

Thirdly:- Do keep doing your good work. Your articles have helped me in imparting some tech knowledge to my subordinates and also to improve the IT infrastructure in my area of work

—Arul

Hey Arul,

Thank you for the kind words and your service to the nation. Digit is as much your magazine as much as it is ours.

—Robert
