

DOES THIS SECTION EVEN NEED AN INTRODUCTION? FROM COMPUTERS TO MOBILES, AND HEADPHONES TO GPUs, IT'S ALL HERE...

THIS MONTH IN TECH: This month in tech, we feature a Made-in-India high-end headphone and we look at some gadgets made to tackle the ongoing pandemic. In Workshop we learn how to use Nearby Share and much more...

NVIDIA considering ARM purchase

NVIDIA has allegedly approached ARM with an acquisition offer. ARM is currently owned by SoftBank holdings, which it acquired in 2016 for USD 32 billion. As per market sources, ARM would be worth USD 44 billion if they pursue an IPO in 2021 and that could go up to USD 68 billion by 2025. <https://dgit.in/RTXARM>

WHAT'S NEW

Intel 7nm delayed. Desktop 7nm CPUs to arrive in 2022-23

Intel announced its Q2 2020 earnings and one of the major announcements relayed during the call was that Intel had identified a "defect mode" in their 7nm process which led to yield degradation issues. As a result, Intel is delaying their 7nm timeline by six months which means that their 7nm CPUs will probably hit the market in late 2022 or early 2023. Until then, they will have to rely on their 14nm and 10nm processes for their production lines. Intel's 10nm process was also delayed multiple times over and with today's announcement, it seems their 7nm is also behind schedule. The

7nm process was supposed to help the company recoup the losses made over their ailing 10nm process and with

this new delay, Intel, which had till now maintained a lead over everyone else will fall behind the likes of TSMC and Samsung. With this delay, there is a good likelihood that by the time Intel does get their 7nm production up to speed, the competition will have moved ahead by one node. <https://dgit.in/aug20-57>

Twitter accounts of multiple public figures hacked

Twitter accounts of some of the world's most recognisable celebrities, politicians and public figures were compromised and ended up being part of a Bitcoin scam for a short while. Those affected by the hack included Amazon founder and CEO, Jepp Zeros; US Presidential candidate, Joe Biden; ex-US President, Barack Obama; Microsoft Co-founder, Bill Gates; Uber; Rapper Kanye

West; reality TV star, Kim Kardashian West; Apple, Tesla and SpaceX Founder, Elon Musk and many more. The Tweets all followed a similar format of soliciting money to be transferred to a Bitcoin

Wallet in return for twice the amount to be transferred back as a gesture of giving back to one's community. The Bitcoin scammers received payments amounting to about USD 121,000 worth of Bitcoin in the wallet that was tweeted out. Twitter believes that at least 130 accounts were affected and 45 of those were used by the perpetrators for the Bitcoin scam. <https://dgit.in/TwitBit>

Olympus quits camera business

Olympus is selling off its Camera business after being one of the biggest brands in the segment for 84 years. This comes after the company reported losses for three years straight. The company still makes optical and scientific equipment such as microscopes and endoscopes. <https://dgit.in/OlympusCamEnd>

AMD Ryzen 4000G "OEM-only" processors unveiled

AMD announced the availability of Ryzen 4000G series of APUs but has limited availability to OEMs only. This means DIY enthusiasts will not be able buy these new 4000G APUs in the retail market, yet. <https://dgit.in/aug20-62>

Gorilla Glass Victus could survive two meter drops

Corning unveiled Gorilla Glass Victus, which is their toughest glass yet and it can supposedly resist a two-meter drop. As per some sources, Corning's Gorilla Glass had gotten worse after Gorilla Glass 3 and Victus is their answer to all their critics. <https://dgit.in/GorillaVictus>
