

You can select from a host of apps to pin for easy access

appear on the bar below the message field.

You can also pin an app to the left-hand-side vertical bar on Microsoft Teams for easy and quick access. To do this, click on 'Apps' at the bottom left side of the screen and then find the app you're looking for by searching and selecting it from the list. Now, click on it and then press 'Add'. The app will get pinned on the bar to the left side of the screen.

FILTER ACTIVITY

If your Microsoft Teams is brimming with activity, chances are you may end up missing an important message at some point in your Activity feed. The Activity feed on Teams is basically a summary of everything that has happened in all the team channels you follow. You can filter the Activity feed to find things of importance that you may have otherwise

missed. Teams allows you to filter the Activity tab by mentions, replies, following, likes, missed call, voicemail and apps. The most-used is probably mentions since you can see everything you have directly been mentioned in by using the '@username' command.

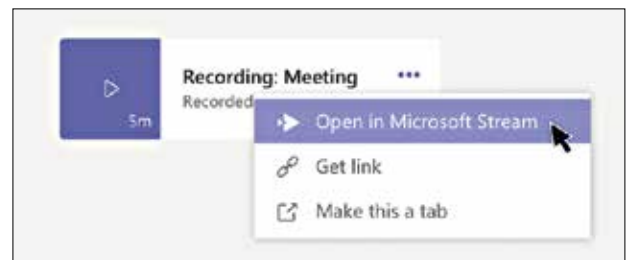

USE SLASH COMMANDS

If you want to master operational efficiency on Microsoft Teams, it will be a good choice to familiarise yourself with the galore of slash commands. Slash commands on Teams help you execute essential operations on the platform quickly. As you probably guessed it, the slash commands use the forward-slash (/) character, followed by the name of the command. To use a slash command, type / followed by the command name in the command box on the top of the Teams screen. To check all the slash com-

mands available on Teams, go to this link - <https://digit.in/slashcommands>.

Some popular slash commands include -

- /goto - Directly go to a team or channel
- /join - Join a team
- /mentions - See all your @mentions
- /testcall - Check your call quality
- /unread - See your unread activity
- /call - Call a Teams contact

Get a transcription of any recorded meeting on Teams

SHARE A CHAT OVER OUTLOOK

As aforementioned, Microsoft Teams is equipped with full integration with Microsoft's suite of apps. One of these apps includes Outlook. So, you can share entire conversations that have taken place on Teams as an email without ever leaving the application. To do this, navigate to the conversation you want to email and then click on the ellipsis button. From the

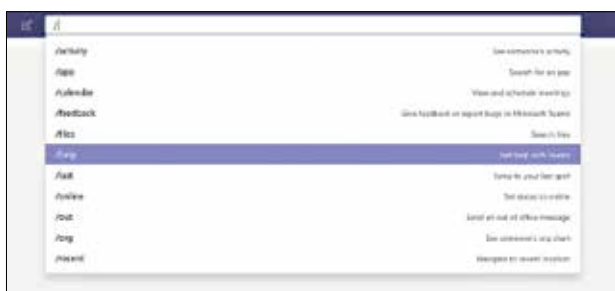

pop-up menu, select 'Share to Outlook'. Now, add your recipient and other relevant information and then hit 'Send'. You can also email the conversation on a Channel in the same manner.

TRANSCRIBE A RECORDED TEAMS MEETING

You may already know that you can record meetings on Teams. It is a pretty commonplace feature and is found on most video collaboration apps out there. Still, for the uninitiated, to record a Teams meeting, simply hit the ellipsis button during a call and click 'Start Recording'. Hit 'Stop Recording' in a similar manner when you're done.

Once the recording appears in Teams, the recording owner (the person who started the recording) can access and edit the closed caption transcript. In order to do this, go to the meeting recording in the

Input slash commands by typing / followed by the command name

chat history on Teams and click on the ellipsis button next to the recording. Then click on 'Open in Microsoft Stream'. On the Microsoft Stream portal, click the ellipsis button yet again and then click on Edit. Now, go to Options > Captions > Download file. Click on it and download the VTT caption file. You can make any changes to the transcription if needed and then save the file to your PC. 📎
