

iPhones with Fortnite

iPhones with Fortnite still installed are reportedly selling on eBay for as much as 40,000 USD! <http://dgit.in/sep20-81>

The Haunting of Bly Manor

Fans of The Haunting of Hill House are getting a 2nd season, but with a new storyline. <http://dgit.in/sep20-82>

day in India but now we've got all the episodes in one single place. Experience what started it all and marvel at the great writing, excellent pacing and

William Shatner hamming it up. Truly a marvel, Star Trek is one of the best sci-fi shows to watch on Netflix.

ALTERED CARBON

Altered Carbon is violent, sexy, incredibly stylish and is one of the best action sci-fi Netflix series on the platform. It tells the story of Takeshi Kovacs who is an elite soldier brought back from the dead using a technology called Stacks that can store the human consciousness. He's summoned by a mysterious benefactor who wants him to investigate his own murder. Sounds wild, right? Oh, you have no idea. If you like the melding of action and sci-fi, you'll love Altered Carbon.

12 MONKEYS

Based on the film of the same name, 12 Monkeys is a mind-bending, time-warping show that takes the best of the film and extrapolates on it. The story of the show deals with a low-life called James in 2043 who has to travel back in time to 2015 to stop the world from being engulfed in a deadly plague caused by the Army of the 12 Monkeys who released the virus. It is a well-crafted show with excellent characters and a great narrative.

LOST IN SPACE

A reboot of the classic show and not-so-classic film, Lost in Space is not one of the best shows on Netflix but it does have some interesting ideas that are worth checking out. The story is a little too silly to take seriously and the show does tend to have some not-so-great writing but makes up for it with an interesting premise and excellent visual effects. While the first season is a little slow, the second season picks up the pace considerably and is an action-packed thrill ride for the whole family.

DARK

The first German Netflix series on the platform, Dark is a mysterious and tense show that does not hold your hand but rewards viewers who pay attention to small details. The show tells the tale of a small town in Germany that holds a ton of dark and deadly secrets that are unveiled after two children go missing in said town. There's time travel, some supernatural elements, and a whole load of excellent TV.

THE RAIN

The Rain is a Netflix sci-fi original series that tells the story of two siblings who have to deal with an empty and hollow world after the world's population has been wiped out by a virus that is spread by the rain. It also acts as a coming-of-age tale in a world that requires you not only survive but to avoid getting wet in the rain at all costs. It also really helps that the show looks amazing and is incredibly well shot. Do not think that this is a Young Adult show, it's so much more than that.

Hotstar+Disney Premium THE ORVILLE

As a lifelong Star Trek fan, it's sad to see what the modern version of the classic 60s show has turned into. And, if like us, you love the old Star Trek, then you'll adore The Orville. Taking its cue from the classic show, The Orville is a starship that travels to different parts of the universe in an effort to spread peace and unity. It's funny, witty and doesn't take itself too seriously, which is what

modern Star Trek completely fails at. Discovery, this is not.

THE MANDALORIAN

A return to form for the failing Star Wars franchise, The Mandalorian is basically a western pulp show disguised as a sci-fi fantasy TV series. The show follows the adventures of the titular Mandalorian as he makes his way through the galaxy blasting droids and rescuing Baby Yoda. One of the best shows of the year, The Mandalorian is the redemption of a franchise that has been run into the ground. If you liked old school Star Wars, you'll have a ton of fun watching The Mandalorian.

STAR WARS: THE CLONE WARS

Another show that still holds the legacy of Star Wars high, The Clone Wars features some of the best storytelling in modern Star Wars. Skip the three films and head on to Disney+ Hotstar to check this show out. We can assure you that you will not be disappointed. The show essentially traces the history of the franchise from the formation of

the Galactic Empire to the destruction of the Jedis. If you've been born by the films and horrible storytelling in them, do yourself a favour and check out The Clone Wars.
