FANTASY

We all love a bit of fantasy in our lives. The idea that something more magical and fantastical could be right around the corner is something that we as humans have been imagining since the dawn of time. We've even written books and stories about fantastical creatures, worlds and characters that have become a very intrinsic part of modern culture.

We've got a list of Fantasy shows for you to check out on Amazon Prime, Netflix, and Hotstar+Disney Premium.

Prime Video

SUPERNATURAL

A show that has really captivated fans all across the world, Supernatural is essentially a story about a family of demon hunters going about their jobs. Well, it's not as simple as that but with 15 seasons done, it's hard to really describe the show to a newbie. But trust us, it's got all the demon-slaying you'll need and really is about the bond between brothers Sam and Dean, out to find their father. It starts off a little slow but the latter seasons really get going.

GOOD OMENS

Based on the novel by the late, great Terry Pratchett and the hack that is Neil Gaiman, Good Omens tells the tale of a demon called Crowley and an angel called Aziraphale as the two must work together to stop the apocalypse from

taking place. Bitingly funny and with some great special effects, the show really retains the spirit of the novel and Pratchett's humour.

NOS4A2

Another adaptation of a novel, NOS4A2 is fantasy horror at its best. A very distinct take on vampirism and the hero, the story is a grim fantasy tale that follows Charlie Manx as he feeds on the souls of children. A slight warning, the show may be a bit difficult for some to watch but it's a very well-told story that has been adapted from the novel by Stephen King's son, Joe Hill. If you're interested there's a graphic novel out as well.

AMERICAN GODS

American Gods is another adaptation of a novel of his but truth be told, it's not a personal favourite. The show differs from the novel in that it's a progressive fantasy show which means that the writers and showrunners have prioritised progressive talking points rather than actual storytelling, but don't take my word for it. A word of warning, the show contains a lot of sexual situations, and a lot of cursing and violence so do beware.

CARNIVAL ROW

One of the newer shows on the platform, Carnival Row is an original Amazon Prime Video show that stars Orlando Bloom and Cara Delevingne. The show basically follows mythical creatures who have fled their war-torn homeland and gathered in the city as tensions are simmering between citizens and the growing immigrant population. With decent special effects and a great storyline, Carnival Row is a show that you should check out if you like a bit of dark fantasy.

Netflix

FROM DUSK TILL DAWN

Based on the cult film of the same name, From Dusk till Dawn is a darker fantasy show that tells the story of brothers Seth and Gordon Gekko as they find themselves in the fight of their lives against vicious vampires and creatures from Aztec mythology. It's a

bit darker and more violent than most fantasy shows but it does feature some great characters including a tough-as-nails sheriff on the trail of the Gekko brothers and a bevy of charming but dangerous vampire lords. A must-watch if you're into horror/fantasy.

LUCIFER

Based on the acclaimed comic book series, Lucifer is one of the wittier TV fantasy shows on Netflix and Tom Ellis plays a mean Devil. The show follows Lucifer as he renounces his position as ruler of Hell and now runs a nightclub in Los Angeles called Lux. He also helps out the LAPD in solving a number of mystical crimes and also battles wayward forces from both Heaven and hell as they attempt to drag him down to once again take over the reigns as the ruler of hell.

THE ORDER

Werewolves and vampires together in a single show? Say it ain't so. The Order looks to take the mythology of these two famous monsters and throws them into a modern-day setting. The show follows John Morton as he joins a society of magic users and finds out that the world he knew was a lie and that darker forces are at play. Cue the werewolves and some excellent special and visual effects. It's hard to actually get a werewolf right on screen but this show does it better than most.
