

still want the apps to show up in the main app drawer. Press and hold the main app drawer tab and then select 'Edit Tab'. Now, select or deselect 'Keep apps in the main app tab' as per your preference.

MICROSOFT LAUNCHER

Microsoft Launcher, previously Arrow Launcher, is a popular Android interface launcher and is almost

they are fairly straightforward and easy to find within the launcher.

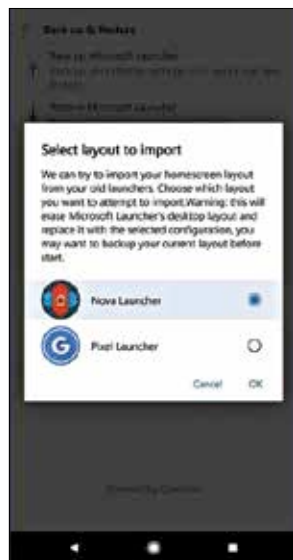

IMPORT HOME SCREEN AND BACKUP AND RESTORE

If you're moving over to Microsoft launcher from another one, the launcher allows you to easily import your home screen arrangement and folders so you don't end up losing all your

as widely-used as Nova Launcher and Google's own Pixel Launcher. Individuals who are tightly integrated with Microsoft's suite of services, over Google's, will find this launcher worth checking out due to its integration with Microsoft's calendar, email, to-do list app, Cortana and direct integration with Microsoft PCs. Even users who aren't deep into Microsoft services can still use the plethora of customisation features and gesture controls this launcher offers. Additionally, it offers a completely Android-native experience, and doesn't attempt to emulate the Windows Phone or Windows 10 look. Here are some tips and tricks for Microsoft Launcher. We have not included tips for simple customisations and Microsoft Cortana, Glance, Timeline and Dock features since

hard work. To import your home screen from another launcher, head over to Microsoft Launcher settings and then tap on Back up & Restore. Click on 'Import home screen' and choose the launcher you want to import your layout from.

Import home screen layouts from another launcher to Microsoft launcher

Similarly, if you want to keep your Microsoft Launcher setup intact when switching phones, you can head over to the same menu as above and then you can simply select 'Back up Microsoft Launcher'. All your settings, icon packs, and app folders will be synced with your Microsoft account and upon signing in to the launcher on your new phone, you can simply 'Restore Microsoft Launcher' from the same settings menu to get back your setup.

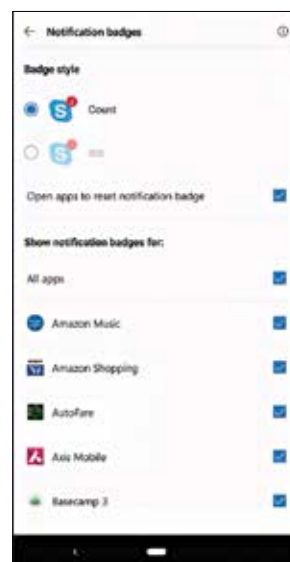

ENABLE HIGH PERFORMANCE MODE

At times, Microsoft Launcher may appear a bit sluggish due to its drawn-out animations and transition effects. To boost the speed of the launcher, you can enable High Performance Mode on the launcher which will speed up animations and transitions based on available system resources. In order to do this, head over to the Microsoft launcher settings and go to 'Personalization'. Now, toggle on High Performance Mode and enjoy snappy animations and transitions on your device.

SHOW NOTIFICATION COUNT

If you're coming to Microsoft Launcher from Nova Launcher, you will be glad to know that displaying notification count is a completely free of cost feature on this app, unlike on Nova which only supports this on its Prime variant. To enable notification count for app icons, open the Microsoft Launcher settings and navigate to 'Personalization'. Now, tap on 'Home Screen' and then toggle on 'Notification badges'.

Choose badge style for notifications on Microsoft Launcher

Here, you will also be able to control badge style, you can set it as 'Count' or 'Dot'. Count displays the exact number of unseen notifications on a particular app's icon, while dot simply displays well... a dot indicating that you have unread notifications. Also, if you have apps that send you an aggravating number of notifications in a day that you simply don't want to read, you can disable notifications for individual apps too.

CREATE FOLDERS IN APP DRAWER

The folder feature is notoriously hard to find in the app drawer in Microsoft Launcher and you may actually end up thinking that there's no way to create folders in the app drawer in this launcher, but you actually can. To create folders within the app drawer, open up the app drawer and then hold the icon of an app that you want to add in the folder. From the menu that appears, click on 'Select Multiple Items'. A greyed-out check mark will appear next to every app icon in the app
