When will the October 2020 SKOAR! Digital Magazine be available?

—Naresh Kumar

When it's done.

—Manish

I am writing to let you guys know that you guys should please fold the posters such that the picture is not on the outside. Doing so ensures that there are no creases on the posters.

I am really annoyed when I see a beautiful poster that I want to put on my wall but it has a nice white crease on it.

Hope you guys will start folding them in the right manner.

—Shrikant Kalar

Hi Shrikant,
We fold it that way in order to display them on the newsstands, so people see the SKOAR! logo rather than just a white sheet of paper. We cannot fold some one way and others another way because it is machine folded. Also, creases would form no matter which way you fold the poster, sadly :-(

—Robert

Hi guys

Love you all, and I hope you guys are safe and well. I love the work you guys do, I have been a subscriber for the past couple of years!! Thank you for all the amazing content.

Now, I will get to the point without beating around the bush, I had reached out to you guys in the past regarding some Fastrack issue that I had lost and was trying to get my hands back on, I was willing to pay for it as well but you generous folks had given me access to a shared google drive which had tons of goodies, including the Fastrack and Dmystify. But now it seems that you guys have either deleted the drive or relocated it somewhere. I found the Fastrack app on google play store but it does not have the one I was looking for. So, now my question is, can I get access to some particular Fastrack issues? Like the one on Microsoft Excel, AWS, and Linux. I am willing to pay for it. I know you guys have the PDF version because it was on that google drive but it's not available on the app on play store. So, please consider my request.

Thank you!
Love you all

—Peshal Jha

Hi Peshal,
All subscribers get access to the old archives. You can access them here: <https://dgit.in/2XKLSQ8>

In the December issue we will include the PDFs from June 2020 to November 2020, so keep an eye out for that.

—Robert

Thanks a ton to DigiT for giving live OpenSUSE DVD, since internet was pathetic in those days, Encarta was the equivalent of google that time.. and openSUSE helped in learning all things as that dvd had almost everything from python to diff IDEs.

—Anush

Hello Anush,
OpenSUSE used to be one of the most requested distros and we always made it a point to give it out whenever there was a major release. Unfortunately, we cannot give out OpenSUSE any more because the releases have become so big, that they occupy more than 4GB of space, which would leave very little room to put anything else in the DVD. We still do give out the latest releases and interesting distros every month, so do keep checking the DVDs. Thank you for writing in.

—Aditya

CTC seriously needs a better site design, with textboxes to enter answers.

—Sternguard Veteran

Feedback noted. There are a number of issues with CTC and we are trying the best way to take the webhunt forward. We have found that the same few people win every year (mostly from Bhubaneswar, and very few have the patience to finish. We are figuring out a way to make it accessible for both dedicated and casual codebreakers.

—Aditya
