

### Realme Smart SLED TV launched

The 55-inch 4K TV was launched alongside other Realme products, including a 100W soundbar. <http://digit.in/nov20-51>

### WD My Passport SSD launched

The WD My Passport line of SSDs have been designed with portability and durability in mind. <http://digit.in/nov20-52>

# Sony 65-inch X9000H TV

## A flagship TV for next gen gaming

Price  
₹209,900

**B**oasting a feature called HDMI 2.1 which brings with it 120FPS, Auto Low Latency Mode, Variable Refresh Rate and more, could the Sony X9000H your next entertainment/gaming TV? Note: a firmware update will be released to enable HDMI 2.1 on this TV and as of writing, the update isn't out. Now, let's dive into the review.

|                      |    |
|----------------------|----|

presented beautifully. The scenes in Young Sheldon look bright, and the facial features of the characters are visible with lots of details.

Coming to gaming, we hooked up the PS4 Pro to the TV and played some God of War and Ghost of Tsushima. The former has a sequence where you are

in a mine, and here, you can see even minute details in the dark corners.

Now, let's address the elephant in the room - HDMI 2.1. The sad thing is that the TV will only have 2 ports supporting HDMI 2.1 (port 3 and 4) which is a bummer when you consider that one of them is the ARC port. So, if you have a home theatre hooked up to this TV via ARC, you only have one HDMI 2.1 enabled port for a console.

### Display

The Sony X90H has a VA panel with support for 4K resolution and HDR 10 along with Dolby Vision support. It also supports Dolby Atmos. Considering it is a VA panel, the viewing angles on this TV are good.

### Performance

Holy smokes, this panel is bright! All our test videos, be it Altered Carbon, Our Planet Grand Tour, looked sublime on this TV.

When consuming Dolby Vision content in a bright room, you may want to stick to Dolby Vision Bright and in a dark room, Dolby Vision Dark as those settings work quite well. With standard HDR content, you can stick to standard or vivid, as per your preference. We played a lot of FHD content like Spider-Man: Homecoming, Young Sheldon, and more, and FHD content is

### Audio performance

For audio, the Sony X90H has two full-range drivers and two tweeters in the 65-inch TV. The output from the TV is 20W but it feels louder. You can hear the bangs and thuds quite well. With Sony's Bass Reflex speakers, you also get decent low end.

### UI

With the X90H, we have a graphically heavy and detailed side navigation UI. When you enter the motion settings, for example, you get a small description

explaining what the setting does and the effect it will have on the picture.

Overall, the Android TV UI is the same we've known for years and the improvements in picture setting and navigation are a welcome change.

### Remote control

The remote control is the same as what we saw last year of the X95G and that's a good thing as we really liked that remote. While we have seen a lot of TV makers go for a more minimalistic approach, this is a full-sized remote control with rubbery and clicky keys and a textured back adding to the grip. It feels premium and is ergonomic.

### Build and design

The TV isn't the slimmest there and considering this is a Full Array backlit TV with local dimming, the thickness is justified. The placement of the ports is pretty standard. They are all on the right side of the TV facing outwards. We have two USB ports, optical audio out, headphones port, an AV port, 4 HDMI ports, an ethernet port, and a good old antenna.

The TV has really slim bezels that do not interfere with the viewing experience. The TV feet have a really slim design but hold it in place quite well.

### Bottom line

While the Sony X9000H isn't Sony's top of the line 2020 LED TV, it is at the sweet spot catering to those that want a flagship TV for next-gen gaming and along with enjoying content consumption. It is a very well-built TV bringing with it a premium design. If there is a problem we have, it's the fact that only 2 ports will get HDMI 2.1.

—Sameer Mitha
