Scientific name: Catopsilia pomona
Common name: Common Emigrant
Where to find: All over India

Also known as the Lemon Emigrant, this tiny and delicate butterfly can be seen flitting around in gardens and parks. It gets its name from the gregarious migrations that it undertakes.

Scientific name: Danaus genutia
Common name: Common Tiger
Where to find: All over India

This is one of the most common butterflies in India, and the colours resemble the American Monarch butterfly. The species is rough and tough, with many adults flying with frayed wings.

Scientific name: Papilio dravidarum
Common name: Malabar Raven
Where to find: Western Ghats

This is a species of butterfly that is extremely common in the Konkan region, but is not found anywhere else in the world. This is one of the species that mimics the Common Crow.
