WHAT'S NEW

Zack Snyder's Justice League has only 4 minutes of new footage

Zack Snyder's Justice League will reportedly be featuring new special effects, scenes, and even a new villain, Darkseid, who wasn't a part of the original film. Some brand new footage was shot for the release of the Snyder Cut earlier this year, however, reports indicate that the new footage is not as much as expected. Snyder, in an interview with Beyond the Trailer, revealed that the film will be featuring only around four to five minutes of new footage. "In the end, it's going to probably be about four or five minutes of additional photography. For the entire movie". Warner Bros. reportedly gave Snyder a budget of \$70 million USD to reshoot and finalise his cut of the Justice League. The new

scenes shot featured Ben Affleck (Batman), Gal Gadot (Wonder Woman), and Ray Fisher (Cyborg). Additionally, Jared Leto (Joker) and Joe Manganiello (Deathstroke) were also brought on to reprise their DCEU roles for the film, so it's rather surprising that we will only have a few minutes worth of new footage. The movie is set to release September on 5, 2021. <https://dgit.in/SnyderCutScenes>
