Sir,
I would like to request for the PDF archive of past Digit Magazines link please. If you kindly share it then the collectors like me would be obliged.

Thank you

—Hirak Guha
Kolkata

Hi Hirak,
You can get access by writing to archive@digit.in and following the instructions you receive in the auto reply.

Sincerely,

—Robert

Dear Editor,
I am reaching to you to understand if you would be interested in publishing an in-depth coverage on Digital Contact Tracing Systems (i.e., Covid-19 Apps used in different countries) focusing on the core technology perspective along with their effectiveness and governance issues in your magazine.

I am the first author of an upcoming book on the topic (published by Springer). Kindly find the link below for your reference.

<https://www.springer.com/gp/book/9789811597268>

Thank you for your time.

Regards,

—Pranab

My brief bio: I am a Senior Manager in the L&D team of Wipro Limited. My interest areas are diverse and at the same time, deep: including Digital Contact Tracing (published a book), Cryptology (published research papers) and Leadership Development (through my job role; also published research papers and articles in international forums).

Hi Pranab,
I look forward to reading your book, and we're carrying your email in our readers letters section as a way of sharing the information with as many readers as possible, so that they can also buy and read your book on a topic that everyone is certainly interested in.

And yes, we shall be in touch to get your inputs on an article on the topic in the near future.

Sincerely,

—Robert

Hi Digit,
My name is Ayush Sharma.
I'm a DevOps Engineer based in

New Delhi, India, and I'm a big fan of your work.

I've been reading Digit for several years now and I've appreciated how much effort you put in staying on the cutting edge of technology. I was wondering if I could use my expertise in Cloud/DevOps to write some content for Digit.

I'm not sure how this process usually goes so I could use some pointers from you.

Can we brainstorm about some ideas for magazine content relating Cloud, infrastructure automation, and software orchestration?

Let me know,

—Ayush Sharma

Hey Ayush,
We most certainly would like to explore getting inputs and articles from core-tech industry sources such as yourself.

The process is quite straightforward. You'd share a few pitch notes pertaining to whichever ideas you would like to write about or contribute towards. You can do so at the beginning of any month, if the article is to be slated for print or anytime of the month for an article that is better represented in digital form.

Once the pitch note has been shared, we can deliberate on the structure of the article and the key points that the article ought to touch upon. We have a set format for print articles which makes it easy for you to convey exactly what's in your mind and what treatment you'd like to give the article.

Once you're done with the article, please share the same and then we can proceed with copy-editing and vetting. After which, it goes to print.

While Digit is more mainstream, we'd also like to point out that Devworx exists particularly so that you can reach out to your peers within the industry. I'd say that you might be more excited to publish your articles on Devworx.

Regards,

—Mithun
