

SECURITY WATCH

Ransomware disguised as Cyberpunk 2077 Mobile hitting the market

Cyberpunk 2077 has been in the news a lot since launch and not all of it is good news. CD Projekt Red has not yet made a 'mobile version' of the popular game, so if you see a mobile version of the game making rounds, you may want to stay clear of it. As reported by TechRadar there is a fake website with a layout of the Google Play Store offering a "mobile version of Cyberpunk 2077". Kaspersky malware analyst "Tatyana Shishkova," says instead of installing a pocket version of the game it installs ransomware on the unsuspecting victim's phone. The ransomware dubbed as CoderWare demands the victim to send \$500 Bitcoins within 10 hours or there is a risk of all the files being deleted. (<http://dgit.in/nomoreransom>).

MOBILE WATCH

Vivo X60 series

Vivo X60 series officially launched on December 29th and it has three phones in the lineup, the X60, X60 Pro and X60 Pro+. The Vivo X60 series features 120 Hz AMOLED screens with the X60 and X60 Pro being powered by the Exynos 1080 and the X60 Pro+ by the Snapdragon 888 processor. The X60 has three cameras on the back that consists of a primary 48MP camera with f/1.79 aperture, a 13 MP ultra-wide-angle camera and a 13 MP portrait camera. The X60 Pro has a quad-camera setup on the rear that has the same two 13 MP cameras from the X60 in addition to an 8 MP periscope camera that brings 5x optical zoom and upto 60X digital zoom. The 48 MP camera gets a f/1.48 aperture. As for the X60 Pro+, it is expected to launch in mid-January and will have a 48MP primary camera with f/1.48 aperture.

APP WATCH

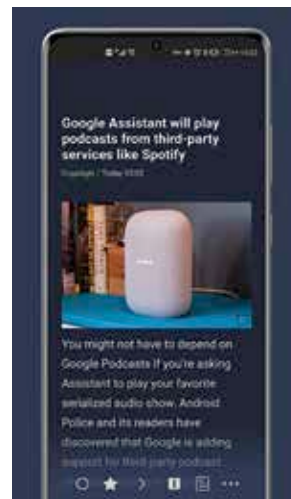

FocusReader

FocusReader is a news reader app in the era where they're getting harder and harder to find. It features a clean, material design and is completely free of cost and ads. The app supports most popular news aggregators such as Feedly, Inoreader, Local RSS, Tiny Tiny RSS, FreshRSS and others. The UI of the app is fairly simple and easy to use even for beginners. The app shows you a list of news articles from your preferred sources on the home screen. You can add new sources by simply searching for them.

The app supports full screen reading, allows you to listen to podcasts within an article, and comes equipped with a bunch of gesture navigation that make it more easy to use. Some gestures include - left swipe stars an article, right swipe marks the article as read, tapping the title opens the article in a web browser, single tap activates full screen mode, double tap activates Readability mode, and others.

Additionally, the app also comes with dark and light themes and comes with offline reading support. So, if you're planning on going offline, in a flight maybe, you can

simply preload certain articles and they will be readable even without an internet connection. What's more is that you can also customise reading settings such as font size, line height, line spacing and alignment, and choose between several fonts. You can also choose to go Premium which lets you access additional themes, manage your subscriptions, delete or rename feeds and folders, filter articles through keywords, turn on auto dark mode, and use multiple accounts.

Poweramp Equalizer

An equalizer app from the developers of Poweramp music player, Poweramp Equalizer allows granular controls via a customizable number of EQ bands with a maximum of 32. It is currently in early-access.

Heynote

Heynote is a unique note-taking apps that turns your notes into wallpapers. You can write over your existing wallpaper if you want to as well, via the app. The fonts used for the wallpaper are quite nice to look at too.

Noobly

Noobly is a social app for gamers that lets you set up a profile with the games you like to play and your interests. After that, the app matches you with profiles similar to yours, who you can then game with.
