A COLLECTION OF PRO TIPS FOR EVERYTHING. Without being limited to a particular topic, these tips are from popular software, to coding, to browsers, search, storage rules, password rules, mobile device hacks, bios cracking, tweaks explained and everything tech under the sun.

basically set up Disappearing Messages that will self-destruct based on a timer the user sets after the recipient reads the message. For example, if you've set a timer for 10 seconds then the messages will disappear exactly 10 seconds after the reader opens them, on both ends. To use this feature, open the desired conversation and then tap on the three-dot menu on the top right corner of the screen. Click on 'Disappearing Messages'; choose a timer from the list and you're done.

Signal

Tips and tricks to make the most out of this privacy-oriented messaging app

Dhriti Datta |
dhriti@digit.in

WHETHER YOU'RE A PROFESSIONAL WITH BUSINESS SECRETS OR AN INDIVIDUAL THAT SIMPLY PUTS PRIVACY FIRST,

Signal is an extremely secure, open-source messaging application that is designed to keep your messages private and your data secure. The open-source code means that it is open to security inspection and peer review, which has led to this app being publicly endorsed by some famous privacy advocates

such as Edward Snowden, Bruce Schneier, and Matt Green. Although the app doesn't have a comparable user-base as WhatsApp, Facebook Messenger, and even Telegram, it brings a steadfast focus on privacy that is rare to find in social apps. The app is developed by Open Whisper Systems, a non-profit organization that is exclusively run by donations and volunteer work. The app has a reputation for security which has made it indispensable to many. The app allows you to use your device's biometrics to unlock the app, without having to download a third-party app

to do the same and even has made it mandatory to set up a PIN during the installation process to ensure security. There are also a ton of lesser-known features that are hyper-focused on privacy on Signal. So, here are some tips and tricks to make the most out of this messaging app.

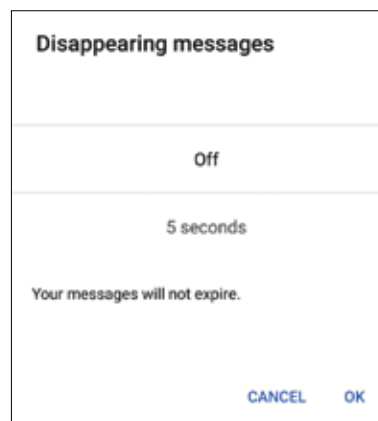

SELF-DESTRUCTING MESSAGES

Since Signal is a privacy-focused messaging app, it makes sense that it has the tools to have an extremely secure conversation, complete with messages that can self-destruct, in a Mission Impossible-esque manner. A similar feature was added to WhatsApp recently, however, this feature has been part of Signal for a while now. You can

BLOCK SCREENSHOTS

If you have a private conversation that you want to ensure cannot be screen-shotted, Signal has a provision to restrict screenshots as well. This way no information on Signal is passed on to other users without your knowledge. When this feature is enabled, Signal blocks users from not only screenshotting within the chat but also from the

Set a timer for 'Disappearing Messages' on Signal
