MUCH LIKE SIGNAL, TELEGRAM IS ANOTHER OPEN-SOURCE MESSAGING APPLICATION that focuses on privacy and security by providing end-to-end encryption in chats and API availability for devs. Over the years, the developers have been adding an array of features to this app, making it a fully-featured messaging client. It is a popular alternative

to messaging apps such as WhatsApp and Messenger and has amassed over 100 million active users. Here are some tips and tricks to help you make the most of this messaging app.

KEEP YOUR CHATS ORGANISED

Messaging apps can get pretty messy owing to the sheer volume of personal chats and group chats one may be part of. Chat Folders in Telegram is an extremely nifty feature that allows you to keep your personal chats, group chats and Telegram channels organised. Having all of these chats in

by opening the hamburger menu and then heading over to Settings > Folders. Now, click on 'Create New Folder' and name it (Personal, Work, Family, etc). After that, you can add the corresponding chats to the newly created folders. Now, in the chat menu, you will have a tabbed UI with different labels allowing you to easily find important chats.

EDIT SENT MESSAGES

Unlike a lot of popular messaging apps, Telegram allows you to edit an already sent message, to maybe fix a typo, or something similar. Simply press and hold the message you'd like to edit and tap on the pencil icon on the top bar of the screen to edit the message. Do note that an edited label will show up next to the message when you've fixed it. You can edit messages up to 48 hours after sending them.

SEND SILENT MESSAGES

There are some instances where you want to send a message to someone without necessarily disturbing them with the message notification tone or vibration, especially in situations where the

one panel can get chaotic and messy pretty quickly, so making use of Chat Folders will allow for a more streamlined experience. You can categorise your chats into different labels

You can set up chat folders to keep them organised
