

**donut.c**

Try out this fun little C code that creates a satisfying 3D spinning doughnut.
<http://dgit.in/jan21-79>

**We Got A Mainframe To Burn!**

Cyberpwned is an automatic solving app for Cyberpunk 2077's hacking minigame, uses OCR. <http://dgit.in/jan21-80>

ULTIMATE GIT CHEAT SHEET

Every command you need to be aware of when using GitHub

SETUP

Configuring user information used across all local repositories

`git config --global user.name "[firstname lastname]"`

Define author name to be used for all commits in current repo. Devs commonly use --global flag to set config options for current user.

`git config --global user.email "[valid-email]"`

set an email address that will be associated with each history marker

`git config --global color.ui auto`
 set automatic command line coloring for Git for easy reviewing

SETUP & INIT

Configuring user information, initializing and cloning repositories

`git init`

initialize an existing directory as a Git repository

`git clone [url]`

retrieve an entire repository from a hosted location via URL

STAGE & SNAPSHOT

Working with snapshots and the Git staging area

`git status`

show modified files in working directory, staged for your next commit

`git add [file]`

add a file as it looks now to your next commit (stage)

`git reset [file]`

unstage a file while retaining the changes in working directory

`git diff`

diff of what is changed but not staged

`git diff --staged`

diff of what is staged but not yet committed

`git commit -m "[descriptive message]"`

commit your staged content as a new commit snapshot

BRANCH & MERGE

Isolating work in branches, changing context, and integrating changes

`git branch`

list your branches. a * will appear next to the currently active branch

`git branch [branch-name]`

create a new branch at the current commit

`git checkout`

switch to another branch and check it out into your working directory

`git merge [branch]`

merge the specified branch's history into the current one

`git log`

show all commits in the current branch's history

BYTES

***Vaccine code reverse engineered**

One programmer has reverse engineered the source code of the RNA used in the BioNTech/Pfizer SARS-Cov-2 Vaccine. Strange but true.
<http://dgit.in/VacRE>

***Google faces biggest outage ever**

Running out of storage on an authentication server can have some deleterious effects. Google learnt that the hard way.
<http://dgit.in/GooNE>

***CyberPunk 2077's minigame beaten**

While it's not a big achievement to beat the hacking minigame within CyberPunk 2077, someone did manage to do so with just 50 lines of code.
