Hi,

This is to inform you that I was a subscriber to the physical digit magazine for several years. I used to buy seven years, five years and three years subscriptions. I am extremely satisfied with the content provided to me over the years. High quality and no complaints at all. However, what I want to point out to you, the editor, is that when I purchased the digital version of digit subscription there was a promotion offer that you would be giving me the Fast Tracks of all the previous editions. So this time I am writing to you to help me out with the previous Fast Tracks and eDVDs. The reason being that I had lent a few

Letter of the Month

Respected Sir

Our English curriculum in schools always made us practice writing a 'Letter to the Editor', but I never thought I would actually be writing one. Although I do not have my personal phone or a gaming PC, this magazine keeps me in touch with technology and also kept me sane, to be honest. Thank you Team Digit for giving me this shiny covered lifeline when i don't have any tech support.

SOME SUGGESTIONS:

1. Can you change the last page of the magazine to something else, maybe a well written conclusion things to look out for in the next issue. Digit team group Photo?
2. Have you considered upgrading/ changing The Cartoon Graphics for Agent001 and others such? They look a little dated.
3. Can you put up a list of groundbreaking products (91-100) in Reviews ever (I've never seen a single one)
4. Please can I get a spare Nvidia GTX1080Ti and GTA5 for my low end pc so that I can play games listed in magazine please.

Point of criticism:-

- 1) WHOEVER ASKED FOR CAR POSTERS PLEASE TELL THEM TO BUY TOP GEAR OR A GOOD PRINTER GAMING TOSTERS PLEASE!

-Shashwat Chaurasia

Hi Shashwat,

Thank you for your email. It must have been hard for you to send this without access to tech on a regular basis, and so we really appreciate the effort you take even more.

As for your suggestions, we will certainly try and include more content about our little team, however, we editorial folk have no say in the matter about ads, just as the advertisers have no say in the matter about what we write. While the cover and Page 1 are fixed positions that we do not sell to advertisers, they are free to choose any other position in the magazine.

You're very right about the Agent001 graphics. We will try and get them updated soon. If any of our readers fancy themselves to be artists, we're also happy to carry an illustration made by one of you.

We are VERY strict with our scoring, and you're right, very, very few products get scored above 90. In our entire history, we have only ever awarded a 100 (perfect) score to India's Chandrayaan and Mangalyaan space missions, and honestly, that's a standard that's pretty much impossible to beat. Rest assured that any product that scores above 75 in our tests is a very good product indeed.

We wish we had GTX 1080s, 2080s or 3090s just lying around, however unfortunately we receive review samples that are sent back to the brands. Those products belong to the brands, not us, so obviously we cannot give them away... but that was a good try!

For now, you're going to have to make do with our mystery prize as the letter of the month winner! :-P
Sincerely,

-Robert Sovereign-Smith
