Getting the most out of the 'front page of the internet'

Dhriti Datta |
dhriti@digit.in

REDDIT HAS BEEN DUBBED AS THE 'FRONT PAGE OF THE INTERNET' AND FOR GOOD REASON.

The platform houses overwhelming amounts of content on every topic imaginable and has a whopping 430 million monthly active users! The platform consists of numerous 'subreddits' dedicated to topics of interest where users or 'redditors' can post content or merely browse through it. Users can spend hours on this rich platform going

through content, upvoting or downvoting as they see fit. While most users browse the platform as they would other social media sites such as Facebook or Instagram, endlessly scrolling through content, there are ways to make the experience more fun and seamless. These tips and tricks are something that you won't generally find on the surface level when using Reddit and will be especially useful if you're new to the platform. With that being said, here are some tips and tricks to supercharge your experience when using Reddit.

COMBINE SUB-REDDITS INTO A MULTIREDDIT

Reddit features an inordinate amount of subreddits

on every topic imaginable. Most users have a set of interests and often, they would follow multiple subreddits pertaining to the same or similar topics. If you're tired of constantly switching between subreddits that you frequent, you can instead group a few subreddits on similar topics together to get one multireddit packed with content from each individual subreddit. With the new Reddit redesign, multireddits are now called 'Custom Feeds'. In order to create a Custom Feed, visit any subreddit that you wish to add into a multireddit. Now, look for the overflow menu (...) on the top left side of the screen next to 'About Community'. Now, click on it and select 'Add To Custom

Feed'. Now, give your custom feed a name and that's it. The subreddit is now added to your Custom Feed. Just follow the same process to add more subreddits to the newly-created custom feed. To access your Custom Feed, go to Home and click the newly-created multireddit under Custom Feed.

CREATE A SLIDE-SHOW OF PICTURES IN A SUBREDDIT

There are multiple subreddits that primarily post pictures such as r/pics, r/flower, and others. If you simply want to view the images in these type of subreddits without being bothered by the text, you can turn the entire subreddit into a nifty slideshow. All you need to do is go to your
