

Goldman v Silverman

Check out this Safdie Brothers short film starring Adam Sandler as a New York City street performer. <http://digit.in/feb21-39>

ZSJL Is No Longer An Episodic

Vero exchange between Zack Snyder and a fan confirms his version of Justice League to be a 4-hour one shot. <http://digit.in/feb21-40>

domain, such as what happened to sharing economy apps or hotel booking apps during the outbreak. Groups of people forming support structures and bunkering down together, formed social bubbles as a method of avoiding complete isolation during the lockdown, making sure that while they were isolated and protected from the rest of the world, they could interact and mix freely among themselves in the place they were sheltered at. It as these bubbles that began to burst around the world in the later stages of the pandemic. One of the reasons for forming bubbles in the first place is to ensure that everyone affected within the bubble voluntarily isolates themselves or opts for quarantine to keep the other people safe.

FAKEAWAYS

As the weeks dragged into months in isolation, people all around the world started missing out on their favorite fast food joints. In an effort to somehow get the same taste of eating at their favourite fast food restaurants, people started

A fakeaway platter of Chinese food

preparing the “dishes” at home. Make sure to post a picture on Instagram before taking a bite, and even if it tastes horrible, the experience is complete as long as the image is pixel perfect. However, the pandemic is not the origin of the term or the trend. Fakeaways actually emerged as a method for making healthier versions of fast food, that were just as tasty. If

you come to think of it, Indian kids and their parents have been getting fakeaways all their lives, and don't even now it. This is because every time mummy makes paani puri and tells you that it is better than the one made in the shop, you have been consuming a fakeaway! Some food bloggers have amassed massive followings by coming up with fakeaway recipes that look very much like the real thing, and are easy enough to follow even for amateurs. Some food service chains jumped into the bandwagon by publishing the recipes for their healthier alternatives, so that their patrons remember them through the outbreak. Fakeaways are only expected to grow as a trend, because the younger sections of the population took to cooking enthusiastically, and the world eats a lot more home cooked food now.

BLURSED DAY

Most of the world spent most of the time during the lockdown in their rooms, in front of their computers. The zoomullets that you see on Instagram and Twitter have been carefully staged, curated and touched up for their suitability on social media. In reality though, we all know that you have to spend two and a half hours trying to avoid getting distracted by the tube-light flare on that one person's nostril hair. It can be exhausting jumping from video call to video call, converting people into so called zoombies. In the tired, dishevelled state, trudging through long periods of isolation, it is just so easy to lose track of time, days and dates, where all of reality blurs into a never ending drone of mundanity, you get what is called the blursed day. It was a blursed day yesterday, is a blursed day today, and will be a blursed day tomorrow. The name technically means both blessed and cursed, but frankly speaking we do not see why it should be either, even though the name is appropriate enough. Even as people found themselves physically isolated, everyone

around the world were forced to get together, come closer and collaborate online, from virtual workout sessions, board game tournaments and quizzes for fanbases. It is not so surprising at all that one day flowed into the next, because that is exactly what happens when you coordinate with time zones around the world.

SGOTUS

Just as the wife of a president is called the first lady, the wife of a vice president is called the second lady. On January 20, 2021 when Kamala Harris

The first Second Gentleman, Douglas Emhoff

assumed office as the vice president of the United States, her husband Doug Emhoff became the first second gentleman in US history. The Second Gentleman of the United States (SGOTUS in case you haven't figured) is not even a formal title, but now there is a convenient gender neutral alternative, “second spouse”. An even more obscure, but more inclusive title is “second partner”, for those not married when assuming office. Throughout history many second ladies have gone on to become the first lady. However, there hasn't been an instance yet where the first lady has been elected as the head of state, at least in the US. If you know of such an occurrence in any other country, do drop in an email to let us know! In an alternative universe where Hillary Clinton won the presidency, Bill Clinton would still be referred to as the President! 🇺🇸
