FEEDBACK FOR THE FEBRUARY 2021 ISSUE

Send feedback to editor@digit.in |
 join us on telegram - t.me/digitgeek |
 or on discord - discord.gg/MyD8Xvt

Hi digit team,

Hope you all are fine. So, here is some feedback on your magazine:

- i) Maybe add two or more pages of gaming in Digit like a review of a game on one page and a page of the latest gaming news, just like tech news.

- ii) Fastrack on DaVinci Resolve, Discord, and how to be a You-Tuber part-2, because you did part-1 a long time ago and a lot has changed.
- iii) Give a SKOAR! on June and December issues.
- iv) Review more laptops and PS5 stuff.

I loved that you included SKOAR! with the December mag, and Feb mag's poster was horizontal which I think is better than vertical, and the Fastrack was awesome.

—Anvith Hegde

Hello Anvith,

SKOAR! has been made a digital exclusive for better or worse, but if you do not like it get more friends to write in to this email address! If you start a Change.org campaign, do drop in another mail to us. ;)

DaVinci Resolve is one of those software that falls in the niche professional category. You need a proper calibrated projector, which is a whole different ball game from a calibrated monitor, and you need a surround sound system setup to edit the video. We usually evaluate how many people will benefit from the stuff we write. Still, we do look forward to covering more suitable topics that allow consumers to get down and dirty with professional tools.

—Aditya

Letter of the Month

Dear magazine,

How are you doing today? I am fine here thank you for asking.

A.I. or Artificial intelligence;

Let me give a perspective on me. I was born in Jalandhar, year 1974 February, in Punjab, and I am a muslim, and rich one compared to the general health of muslims, let's say that I am above average in most things, thanks to my dad not me, after a few years here and then we moved to Poona where we stayed for 7 years, where I finished my studies, after I took a decision to stop studies and join the workforce. I did BCS or Bachelor's Degree in Computer Science, with a lot of difficulties, these diff were only studywise not much else, all my life I have been invisible to everyone, nothing much to say, and have led an unremarkable life. So, after Pune we came to Bombay, where I have been ever since. So, again, I have led an unremarkable life, for the past few

decades, since 1997, I do not mind that, infact I like living like this.

So, my question to you is, are you still taking emails on this id, and a few questions on computers, A.I. in games and in business as business intelligence? Two subjects that you have not touched upon, I think it is because the subject is huge, compared to other topics, and yada yada, I mean, etc etc, would love to hear from you on these,

Have fun, bye...

Regards,

—Raheel.A.Nomani.

Hi Raheel,

Thanks for your email. Received both your emails in fact.

We'll try and cover the topics you have suggested, though we have done them in parts, we haven't looked at them as a whole yet.

And yes, we still accept questions about troubleshooting, buying advice, etc.

Regards,

—Robert Sovereign-Smith
