Google Drive

Make the most of Google's famed cloud storage service

Dhriti Datta |

SINCE ITS DEBUT IN 2012, GOOGLE DRIVE HAS EVOLVED IN NUMEROUS WAYS and is now an essential day-to-day tool for many users. Under the umbrella of Google Drive, there's a file management and storage service that includes various web and mobile apps. As of July 2018, Google Drive amassed over one billion active users, and there are over two trillion files stored on the service. The service makes file sharing and cloud

storage easy. Furthermore, the service comes equipped with collaborative tools and built-in integrations with Google's suite of products and services. Google Drive is even more useful now when many companies are adopting the work from home norm since it bridges the physical gap between coworkers and collaborators that are forced apart due to the pandemic. While most of us know our way around the basics of the service, there are some extra features and tricks that you can employ to make the most out of the cloud storage and file sharing service.

**FIND FILES EASILY
WITH SEARCH
OPTIONS**

Instead of sifting through all

your files on Google Drive when you're searching for one, you can do an advanced search by using search options. To do so,

click on the downwards arrow on the right side of the 'Search Drive' bar. Here, you can narrow down your file by choosing the type of document (Docs, Sheets, Slides, Forms, etc), owner of the document, location and other such parameters. You can also enter a name that you think will match the file name and even search a document on the basis of the content inside it. This really takes out the sting of finding long-lost documents in the depths of your Google Drive account.

Furthermore, Google Drive also supports Natural Language Processing for search, so you can essentially search as you talk. You can type something as simple as "find my budget spreadsheet from last November" or "show me presentations from xxx" and Drive should be able to whip the right document out.

Use advanced search with 'Search Options' on Google Drive
